

Which Seed Is This

Seed

anything that can be sown, which may include seed and husk or tuber. Seeds are the product of the ripened ovule, after the embryo sac is fertilized by sperm

In botany, a seed is a plant structure containing an embryo and stored nutrients in a protective coat called a testa. More generally, the term "seed" means anything that can be sown, which may include seed and husk or tuber. Seeds are the product of the ripened ovule, after the embryo sac is fertilized by sperm from pollen, forming a zygote. The embryo within a seed develops from the zygote and grows within the mother plant to a certain size before growth is halted.

The formation of the seed is the defining part of the process of reproduction in seed plants (spermatophytes). Other plants such as ferns, mosses and liverworts, do not have seeds and use water-dependent means to propagate themselves. Seed plants now dominate biological niches on land, from forests to grasslands both in hot and cold climates.

In the flowering plants, the ovary ripens into a fruit which contains the seed and serves to disseminate it. Many structures commonly referred to as "seeds" are actually dry fruits. Sunflower seeds are sometimes sold commercially while still enclosed within the hard wall of the fruit, which must be split open to reach the seed. Different groups of plants have other modifications, the so-called stone fruits (such as the peach) have a hardened fruit layer (the endocarp) fused to and surrounding the actual seed. Nuts are the one-seeded, hard-shelled fruit of some plants with an indehiscent seed, such as an acorn or hazelnut.

Chia seed

Chia seeds (/tʃiː/ CHEE-ah) are the edible seeds of Salvia hispanica, a flowering plant in the mint family (Lamiaceae) native to central and southern

Chia seeds (CHEE-ah) are the edible seeds of Salvia hispanica, a flowering plant in the mint family (Lamiaceae) native to central and southern Mexico, or of the related Salvia columbariae, Salvia polystachia, or Salvia tiliifolia. Chia seeds are oval and gray with black and white spots, and have a diameter of around 2 millimetres (0.08 in). The seeds are hygroscopic, absorbing up to 12 times their weight in liquid when soaked and developing a mucilaginous coating that gives chia-based foods and beverages a distinctive gel texture.

There is evidence that the crop was widely cultivated by the Aztecs in pre-Columbian times and was a staple food for Mesoamerican cultures. Chia seeds are cultivated on a small scale in their ancestral homeland of central Mexico and Guatemala and commercially throughout Central and South America.

Mobile Suit Gundam SEED

Mobile Suit Gundam SEED (Japanese: ????????SEED(???), Hepburn: Kidō Senshi Gandamu Shōdo) is an anime series developed by Sunrise and directed by Mitsuo

Mobile Suit Gundam SEED (Japanese: ????????SEED(???), Hepburn: Kidō Senshi Gandamu Shōdo) is an anime series developed by Sunrise and directed by Mitsuo Fukuda. The ninth installment in the Gundam franchise, Gundam SEED takes place in a future calendar era, in this case the Cosmic Era. In this era, mankind has developed into two subspecies: Naturals, who reside on Earth, and Coordinators, genetically enhanced humans capable of amazing feats of intellect who emigrate to man-made orbital colonies to escape persecution by natural humans. The story revolves around a young Coordinator Kira Yamato who becomes involved in the war between the two races after a third, neutral faction's

space colony is invaded by the Coordinators.

The television series was broadcast in Japan between 2002 and 2003, on the Tokyo Broadcasting System Television and MBS TV networks, beginning a broadcast partnership with the Gundam franchise. The series spawned three compilation films and was adapted into a manga as well as light novels. A sequel series, *Mobile Suit Gundam SEED Destiny* followed in 2004 and a followup film, *Mobile Suit Gundam SEED Freedom* was released in 2024. Merchandise has been released, including models, CD soundtracks and video games. *Gundam SEED* was licensed by Bandai Entertainment for broadcast in North America, and began airing in the United States and Canada in 2004. The films and the sequel were also licensed by Bandai. The manga and light novels as well as the spin-off series, *Mobile Suit Gundam SEED Astray*, were licensed. Video games were released in North America. In 2011, a HD remaster of the series consisting of 48 episodes was released.

Mobile Suit Gundam SEED was widely popular with the public in Japan, winning numerous awards, with high sales of the series DVD and music. It was also a critical success with writers focusing on the character development and animation especially the leads. However, similarities with previous Gundam series were noted.

Seedbed

A seedbed or seedling bed is the local soil environment in which seeds are planted. Often, it comprises not only the soil but also a specially prepared

A seedbed or seedling bed is the local soil environment in which seeds are planted. Often, it comprises not only the soil but also a specially prepared cold frame, hotbed or raised bed used to grow the seedlings in a controlled environment into larger young plants before transplanting them into a garden or field. A seedling bed increases the number of seeds that germinate.

Pumpkin seed

A pumpkin seed, also known as a pepita (from the Mexican Spanish: pepita de calabaza, 'little seed of squash'), is the edible seed of a pumpkin or certain

A pumpkin seed, also known as a pepita (from the Mexican Spanish: pepita de calabaza, 'little seed of squash'), is the edible seed of a pumpkin or certain other cultivars of squash. The seeds are typically flat and oval with two axes of symmetry, have a white outer husk, and are light green after the husk is removed. Some pumpkin cultivars are huskless and are grown only for their edible seed. The seeds are nutrient- and calorie-rich, with an especially high content of fat (particularly linoleic acid and oleic acid), protein, dietary fiber, and numerous micronutrients. Pumpkin seed can refer either to the hulled kernel or unhulled whole seed, and most commonly refers to the roasted end product used as a snack.

Svalbard Global Seed Vault

The Svalbard Global Seed Vault (Norwegian: Svalbard globale frøhvelv) is a secure backup facility for the world's crop diversity on the Norwegian island

The Svalbard Global Seed Vault (Norwegian: Svalbard globale frøhvelv) is a secure backup facility for the world's crop diversity on the Norwegian island of Spitsbergen in the remote Arctic Svalbard archipelago. The Seed Vault provides long-term storage for duplicates of seeds from around the world, conserved in gene banks. This provides security of the world's food supply against the loss of seeds in genebanks due to mismanagement, accident, equipment failures, funding cuts, war, sabotage, disease, and natural disasters. The Seed Vault is managed under terms spelled out in a tripartite agreement among the Norwegian government, the Crop Trust, and the Nordic Genetic Resource Center (NordGen).

The Norwegian government entirely funded the Seed Vault's approximately 45 million kr (US\$8.8 million in 2008) construction cost. Norway and the Crop Trust pay for operational costs. Storing seeds in the vault is free to depositors.

As of June 2025, the Seed Vault conserves 1,355,591 accessions, representing more than 13,000 years of agricultural history.

Seed drill

tractor. This ensures that seeds will be distributed evenly. The seed drill sows the seeds at the proper seeding rate and depth, ensuring that the seeds are

A seed drill is a device used in agriculture that sows seeds for crops by positioning them in the soil and burying them to a specific depth while being dragged by a tractor. This ensures that seeds will be distributed evenly.

The seed drill sows the seeds at the proper seeding rate and depth, ensuring that the seeds are covered by soil. This saves them from being eaten by birds and animals, or being dried up due to exposure to the sun. With seed drill machines, seeds are distributed in rows; this allows plants to get sufficient sunlight and nutrients from the soil.

Before the introduction of the seed drill, most seeds were planted by hand broadcasting, an imprecise and wasteful process with a poor distribution of seeds and low productivity. The use of a seed drill can improve the ratio of crop yield (seeds harvested per seed planted) by as much as eight times while also saving time and labor.

Some machines for metering out seeds for planting are called planters. The concepts evolved from ancient Chinese practice and later evolved into mechanisms that pick up seeds from a bin and deposit them down a tube.

Seed drills of earlier centuries included single-tube seed drills in Sumer and multi-tube seed drills in China, and later a seed drill in 1701 by Jethro Tull that was influential in the growth of farming technology in recent centuries. Even for a century after Tull, hand-sowing of grain remained common.

List of Mobile Suit Gundam SEED characters

the Mobile Suit Gundam SEED and Mobile Suit Gundam SEED Destiny anime television series, the sequel film Mobile Suit Gundam SEED Freedom, as well as in

This is a list of fictional characters featured in the Cosmic Era (CE) timeline of the Gundam anime metaseries. These characters appear in the Mobile Suit Gundam SEED and Mobile Suit Gundam SEED Destiny anime television series, the sequel film Mobile Suit Gundam SEED Freedom, as well as in the manga and OVA spinoffs. Both series focus on the raging conflict between Naturals and Coordinators, the former being regular humans and the latter being genetically-enhanced ones.

Mobile Suit Gundam SEED begins when the neutral space colony Heliopolis is attacked by ZAFT, a military organization composed of Coordinators. Coordinator Kira Yamato pilots the mobile suit GAT-X105 Strike to protect his friends on the Naturals' ship Archangel from potential enemies as they head towards Earth. Mobile Suit Gundam SEED Destiny continues two years after Mobile Suit Gundam SEED and follows the teenager Shinn Asuka and his duties in ZAFT.

Sprouting

Sprouting is the natural process by which seeds or spores germinate and put out shoots, and already established plants produce new leaves or buds, or

Sprouting is the natural process by which seeds or spores germinate and put out shoots, and already established plants produce new leaves or buds, or other structures experience further growth.

In the field of nutrition, the term signifies the practice of germinating seeds (for example, mung beans or sunflower seeds) to be eaten raw or cooked, which is considered more nutritious.

List of Mobile Suit Gundam SEED episodes

The Mobile Suit Gundam SEED anime series is animated by the Japanese anime studio Sunrise and directed by Mitsuo Fukuda. It aired from October 5, 2002

The Mobile Suit Gundam SEED anime series is animated by the Japanese anime studio Sunrise and directed by Mitsuo Fukuda. It aired from October 5, 2002 to September 27, 2003, with fifty episodes on TBS. As with other series from the Gundam franchise, Gundam SEED takes place in a parallel timeline, in this case the Cosmic Era, the first to do so. In this era, mankind has developed into two subspecies: Naturals, who reside on Earth and Coordinators, genetically-enhanced humans capable of withstanding the rigors of space who inhabit orbital colonies. The story revolves around a young Coordinator Kira Yamato who becomes involved in the war between the two races after a neutral space colony is invaded by the Coordinators.

Mobile Suit Gundam SEED was dubbed in English and its first English air date was on April 17, 2004 on the American cable network Cartoon Network as part of its Saturday night Toonami block, and was later moved to its unnamed "Graveyard Shift" block on late Friday evenings/early Saturday mornings in late 2004. It was later broadcast on Canada's YTV starting on September 10, 2004, Australia's Adult Swim starting on December 12, 2005, and the United Kingdom's AnimeCentral starting on January 5, 2008.

Seven themes of music were used for the original version of the series. Its openings were "Invoke" (INVOKE -?????-, Inv?ku) by T.M.Revolution from episode one to thirteen, "Moment" by Vivian or Kazuma from fourteen to twenty six, "Believe" from twenty seven to forty, and "Realize" for the rest of the series both by Nami Tamaki. The three ending themes are "Anna ni Issho Datta no ni" (???????????; lit. "Although We Were Always Together") by See-Saw from episodes one to twenty six, "River" by Tatsuya Ishii from twenty seven to thirty nine, and "Find the Way" by Mika Nakashima towards the end. The English TV dub used a 30-second shortened version of "Invoke" as its opening, but used the same endings as the original (albeit with edited visuals). The English DVD dub uses the original openings in their original format. For Japan's HD remaster, Gundam SEED cut the two recap episodes from its original broadcast (14 and 26). FictionJunction's new theme "Distance" replaced all uses of "River" with the exception of episode 40 with "Akatsuki no Kuruma" (???) by FictionJunction.

A sequel called Mobile Suit Gundam SEED Destiny, aired from October 9, 2004 to October 1, 2005, also with fifty episodes. Both SEED and SEED Destiny have special editions which are condensed versions of the series that include additional footage. Mobile Suit Gundam SEED C.E. 73: Stargazer, which is directed by Susumu Nishizawa, is a three-episode original net animation (ONA). The first episode of the side story was first streamed on the internet on July 14, 2006, but it premiered a week earlier on July 7, 2006 at Tokyo Anime Center's Akiba 3D Theater.
