A massively multiplayer online game (MMOG or more commonly MMO) is an online video game with a large number of players to interact in the same online game world. MMOs usually feature a huge, persistent open world, although there are games that differ. These games can be found for most network-capable platforms, including the personal computer, video game console, or smartphones and other mobile devices.

MMOs can enable players to cooperate and compete with each other on a large scale, and sometimes to interact meaningfully with people around the world. They include a variety of gameplay types, representing many video game genres.

New World (video game)

Relentless Studios "The Amazon Games studio behind 'New World' levels up its MMO ambitions with 'The Lord of the Rings' project". Amazon Games. May 15, 2023

New World is a massively multiplayer online role-playing game (MMORPG) developed by Amazon Games Orange County and published by Amazon Games released on September 28, 2021. The game was previously scheduled to release in May 2020 and subsequently August 2021, but was delayed until its worldwide release on September 28, 2021. Set in the mid-seventeenth century, players colonize the lost fantasy land of Aeternum, modeled after the Americas, where everyone who travels to it becomes immortal.

While New World was initially planned as a free-to-play game, it currently employs the standard business model of a buy-to-play game, a point of historical difference in comparison to many—mostly much older—MMORPGs that traditionally utilized subscription models in service of significant regular content updates. The game also offers microtransactions in the form of skins along with a limited selection of both decorative and gameplay-impacting functional items for use within the player housing system.

PlayStation 5 and Xbox Series X/S versions of the game, under the title New World: Aeternum were released on October 15, 2024, along with significant game updates for existing PC users. A television adaptation, "New World: The Once and Future King", was released on December 10, 2024 as an episode of Secret Level, starring the voices of Arnold Schwarzenegger, Steven Pacey, Gabriel Luna, Arazou, Dana Haqjoo, and Carlo Rota.
