The Tamil calendar (தமிழ்த் திண்டிவிக்கா) is a sidereal solar calendar used by the Tamil people of the Indian subcontinent. It is also used in Puducherry, and by the Tamil population in Sri Lanka, Malaysia, Singapore, Myanmar and Mauritius.

It is used in contemporary times for cultural, religious and agricultural events, with the Gregorian calendar largely used for official purposes both within and outside India. The Tamil calendar is based on the solar calendar.

Islamic calendar

Hijri calendar (Arabic: التقويم الهجري, romanized: al-taqwīm al-hijrī), also known in English as the Islamic calendar, is a lunar calendar consisting

The Hijri calendar (Arabic: التقويم الهجري, romanized: al-taqwīm al-hijrī), also known in English as the Islamic calendar, is a lunar calendar consisting of 12 lunar months in a year of 354 or 355 days. It is used to determine the proper days of Islamic holidays and rituals, such as the annual fasting and the annual season for the great pilgrimage. In almost all countries where the predominant religion is Islam, the civil calendar is the Gregorian calendar, with Syriac month-names used in the Levant and Mesopotamia (Iraq, Syria, Jordan, Lebanon and Palestine), but the religious calendar is the Hijri one.

This calendar enumerates the Hijri era, whose epoch was established as the Islamic New Year in 622 CE. During that year, Muhammad and his followers migrated from Mecca to Medina and established the first Muslim community (ummah), an event commemorated as the Hijrah. In the West, dates in this era are usually denoted AH (Latin: Anno Hegirae, lit. 'In the year of the Hijrah'). In Muslim countries, it is also sometimes denoted as H from its Arabic form (هجري, abbreviated هـ). In English, years prior to the Hijra are denoted as BH ("Before the Hijra").

Since 26 June 2025 CE, the current Islamic year is 1447 AH. In the Gregorian calendar reckoning, 1447 AH runs from 26 June 2025 to approximately 15 June 2026.

Julian calendar

Julian calendar is a solar calendar of 365 days in every year with an additional leap day every fourth year (without exception). The Julian calendar is still

The Julian calendar is a solar calendar of 365 days in every year with an additional leap day every fourth year (without exception). The Julian calendar is still used as a religious calendar in parts of the Eastern Orthodox Church and in parts of Oriental Orthodoxy as well as by the Amazigh people (also known as the Berbers). For a quick calculation, between 1901 and 2099 the much more common Gregorian date equals the Julian date plus 13 days.

The Julian calendar was proposed in 46 BC by (and takes its name from) Julius Caesar, as a reform of the earlier Roman calendar, which was largely a lunisolar one. It took effect on 1 January 45 BC, by his edict. Caesar's calendar became the predominant calendar in the Roman Empire and subsequently most of the Western world for more than 1,600 years, until 1582 when Pope Gregory XIII promulgated a revised

calendar. Ancient Romans typically designated years by the names of ruling consuls; the Anno Domini system of numbering years was not devised until 525, and became widespread in Europe in the eighth century.

The Julian calendar has two types of years: a normal year of 365 days and a leap year of 366 days. They follow a simple cycle of three normal years and one leap year, giving an average year that is 365.25 days long. That is more than the actual solar year value of approximately 365.2422 days (the current value, which varies), which means the Julian calendar gains one day every 129 years. In other words, the Julian calendar gains 3.1 days every 400 years.

Gregory's calendar reform modified the Julian rule by eliminating occasional leap days, to reduce the average length of the calendar year from 365.25 days to 365.2425 days and thus almost eliminated the Julian calendar's drift against the solar year: the Gregorian calendar gains just 0.1 day over 400 years. For any given event during the years from 1901 through 2099, its date according to the Julian calendar is 13 days behind its corresponding Gregorian date (for instance Julian 1 January falls on Gregorian 14 January). Most Catholic countries adopted the new calendar immediately; Protestant countries did so slowly in the course of the following two centuries or so; most Orthodox countries retain the Julian calendar for religious purposes but adopted the Gregorian as their civil calendar in the early part of the twentieth century.

A Synchronic Chinese-Western Daily Calendar: 1341–1661 A.D.

A Synchronic Chinese-Western Daily Calendar: 1341–1661 A.D. is a calendar conversion table generated by computer, published in 1984. It allows the conversion

A Synchronic Chinese-Western Daily Calendar: 1341–1661 A.D. is a calendar conversion table generated by computer, published in 1984. It allows the conversion of dates in the Chinese calendars used during the Ming dynasty (1368–1644) into the Julian calendar (before 1582) and the Gregorian calendar (after 1582). A Synchronic Chinese-Western Daily Calendar can also be described as a concordance (???; Duìzhàobi?o).

Ethiopian calendar

The Ethiopian calendar (Amharic: ??? ??; Ge'ez: ??? ???; Tigrinya: ??? ???), or Ge'ez calendar (Ge'ez: ??? ???; Tigrinya: ??? ???, Amharic: ?????? ???

The Ethiopian calendar (Amharic: ??? ??; Ge'ez: ??? ???; Tigrinya: ??? ???), or Ge'ez calendar (Ge'ez: ??? ???; Tigrinya: ??? ???, Amharic: ?????? ??? ???) is the official state civil calendar of Ethiopia and serves as an unofficial customary cultural calendar in Eritrea, and among Ethiopians and Eritreans in the diaspora. It is also an ecclesiastical calendar for Ethiopian Christians and Eritrean Christians belonging to the Orthodox Tewahedo Churches (Ethiopian Orthodox Tewahedo Church and Eritrean Orthodox Tewahedo Church), Eastern Catholic Churches (Eritrean Catholic Church and Ethiopian Catholic Church), and Protestant Christian P'ent'ay (Ethiopian-Eritrean Evangelical) Churches. The Ethiopian calendar is a solar calendar that has much in common with the Coptic calendar of the Coptic Orthodox Church of Alexandria and Coptic Catholic Church, but like the Julian calendar, it adds a leap day every four years without exception, and begins the year on 11 or 12th of September in the Gregorian calendar (from 1900 to 2099). its epoch (first day of first year) equates to 29 August 8 AD. The neighbouring Coptic calendar is very similar to the Ethiopian calendar, except that it has a different epoch (29 August, 284 AD) and different names for the days of the week and months of the year.

The Ethiopian calendar has twelve months, all thirty days long, and five or six epagomenal days, which form a thirteenth month. The Ethiopian months begin on the same days as those of the Coptic calendar, but their names are in Ge'ez. A sixth epagomenal day is added every four years, without exception, on 29 August of the Julian calendar, six months before the corresponding Julian leap day. Thus, the first day of the Ethiopian calendar year, 1 Mäskäräm, for years between 1900 and 2099 (inclusive), is usually 11 September (Gregorian). It falls on 12 September in years before the Gregorian leap year, however.

Copyright law of India

located in public spaces. The case The Daily Calendar Supplying v. The United Concern (1958) concerned the Daily Calendar Supplying Bureau's commercial distributions

The Copyright Act, 1957 as amended governs the subject of copyright law in India. The Act is applicable from 21 January 1958. The history of copyright law in India can be traced back to its colonial era under the British Empire. The Copyright Act 1957 was the first post-independence copyright legislation in India and the law has been amended six times since 1957. The most recent amendment was in the year 2012, through the Copyright (Amendment) Act 2012.

India is a member of most of the important international conventions governing the area of copyright law, including the Berne Convention of 1886 (as modified at Paris in 1971), the Universal Copyright Convention of 1951, the Rome Convention of 1961 and the Agreement on Trade Related Aspects of Intellectual Property Rights (TRIPS). Initially, India was not a member of the WIPO Copyright Treaty (WCT) and the WIPO Performances and Phonograms Treaty (WPPT) but subsequently entered the treaty in 2013.

Daf Yomi

Holocaust, and having a unifying factor among Jews. Each day of the daily calendar, including Tisha B'Av, is included, and online audio versions of lectures

Daf Yomi (Hebrew: דף יומי, Daf Yomi, "page of the day" or "daily folio") is a daily regimen of learning the Oral Torah and its commentaries (also known as the Gemara), in which each of the 2,711 pages of the Babylonian Talmud is covered in sequence. A daf, or blatt in Yiddish, consists of both sides of the page. Under this regimen, the entire Talmud is completed, one day at a time, in a cycle of approximately seven and a half years. As of today, August 21, 2025, the study is of Tractate Avodah Zarah, page 64.

Tens of thousands of Jews worldwide study in the Daf Yomi program, and over 300,000 participate in the Siyum HaShas, an event celebrating the culmination of the cycle of learning. The Daf Yomi program has been credited with making Talmud study accessible to Jews who are not Torah scholars, contributing to Jewish continuity after the Holocaust, and having a unifying factor among Jews. Each day of the daily calendar, including Tisha B'Av, is included, and online audio versions of lectures are available.

Thai calendar

In Thailand, two main calendar systems are used alongside each other: the Thai solar calendar, based on the Gregorian calendar and used for official and most day-to-day purposes, and the Thai lunar calendar (a version of the Buddhist calendar, technically a lunisolar calendar), used for traditional events and Buddhist religious practices.

Pirelli Calendar

The Pirelli Calendar, known and trade-marked as "The Cal", is an annual trade calendar which has been published by the UK subsidiary of the Italian tyre

The Pirelli Calendar, known and trade-marked as "The Cal", is an annual trade calendar which has been published by the UK subsidiary of the Italian tyre manufacturing company Pirelli since 1964. The calendar has a reputation for its choice of photographers and models and featured glamour photography from the 1980s until the 2010s.

The calendar is produced with limited availability (20,000 are printed annually). Copies do not go on sale, but are instead given as corporate gifts to celebrities and select Pirelli customers. The annual production cost was about US\$2 million in 2017. Marco Tronchetti Provera, Pirelli's CEO from 1992 to 2022, commented that the purpose of the Cal is "to mark the passing of time" by recording the zeitgeist.

Calendar (stationery)

century Welsh calendar of saints A Soviet calendar, showing 22 October 1935, with a daily chess problem for entertainment An Ottoman day calendar showing the

A calendar is used to display dates and related information, usually in a table format. Calendars are used to plan future events and keep track of appointments, and so a typical calendar will include days of the week, week numbering, months, public holidays and clock changes. Printed calendars also often contain additional information relevant for specific groups – for instance, a Christian liturgical calendar will show holy days and liturgical colours, while a calendar for amateur astronomers will highlight phases of the moon, conjunctions and eclipses. Alongside their practical uses, calendars have taken on a decorative purpose, offering an easy way to introduce regularly changing artwork to a space, and have even influenced art and sexuality by popularizing the pin-up style.
