Has Facebook Been Misused

Strategies for e-Business

This is the fourth edition of a unique textbook that provides extensive coverage of the evolution, the current state, and the practice of e-business strategies. It provides a solid introduction to understanding e-business and e-commerce by combining fundamental concepts and application models with practice-based case studies. An ideal classroom companion for business schools, the authors use their extensive knowledge to show how corporate strategy can imbibe and thrive by adopting vibrant e-business frameworks with proper tools. Students will gain a thorough knowledge of developing electronic and mobile commerce strategies and the methods to deal with these issues and challenges.

Personal Data as an Economic Asset

Philipp Jaud explores the compatibility of personal data as an economic asset with the European Union's Charter of Fundamental Rights. By analysing the nuanced nature of personal data, the contextual interpretation of the Court of Justice of the EU is brought into focus, with the author delving into data monetisation, profiling, and breaches to highlight the variable value of personal data. Emphasising data subjects' rights, ownership debates and proposals for legal frameworks are discussed, while legislative responses and challenges in the digital age are scrutinised and a balanced approach is advocated for. The Charter's applicability to economic data use is explored, underlining fairness, transparency, and consent. The conclusion allows the reader to contemplate the potential alignment of economic data use with the Charter, accentuating individual autonomy within evolving legal frameworks and societal consciousness.

Information Technology Law

Do you download music or shop online? Who regulates large companies such as Google and Facebook? How safe is your personal data on the internet? Information technology affects all aspects of modern life. From the information shared on websites such as Facebook, Twitter, and Instagram to online shopping and mobile devices, it is rare that a person is not touched by some form of IT every day. Information Technology Law examines the legal dimensions of these everyday interactions with technology and the impact on privacy and data protection, as well as their relationship to other areas of substantive law, including intellectual property and criminal proceedings. Since the pioneering publication of the first edition over twenty years ago, this forward-thinking text has established itself as the most readable and comprehensive textbook on the subject, covering the key topics in this dynamic and fast-moving field in a clear and engaging style. Focussing primarily on developments within the UK and EU, this book provides a broad-ranging introduction and analysis of the increasingly complex relationship between the law and IT. Information Technology Law is essential reading for students of IT law and also appropriate for business and management students, as well as IT and legal professionals. Online Resource Centre The Online Resource Centre hosts a catalogue of web links to key readings, updates to the law since publication, as well as linking to the author's own IT law blog.

Methods, Methodologies, and Perspectives in the Humanities and Social Sciences With Particular Reference to Islamic Studies: A Critical Rationalist Interpretation

This book presents the first comprehensive introduction to methods and methodologies in the humanities and social sciences in general, and Islamic Studies in particular, from a critical rationalist point of view. The book aims to be a self-sufficient theoretical and practical guide to the topics that it introduces. It contains a large selection of fully worked out review activities and review questions plus topics for further discussion which

are devised to assist readers to better understand the issues which are discussed in the book. Last but not least, all efforts have been made to make sure that most (if not all) of the reading materials which are recommended in the book are not only of the highest quality but also freely available on the internet.

Illicit Trade Misuse of Small Parcels for Trade in Counterfeit Goods Facts and Trends

This study examines the potential for the misuse of small parcels for trade in counterfeit and pirated goods. It presents the legal and economic contexts of the operation of express and postal services. It also looks at the available data on volumes of small consignments, via postal and courier ...

AI for Everyone: benefitting from and building trust in the technology

If governed adequately, AI (artificial intelligence) has the potential to benefit humankind enormously. However, if mismanaged, it also has the potential to harm humanity catastrophically. The title of this book reflects the belief that access to the benefits of AI, awareness about the nature of the technology, governance of the technology and its development process with a focus on responsible development, should be transparent, open, understood by and accessible to all people regardless of their geographic, generational, economic, cultural and/or other social background. The book is the result of a discussion series organized by the Association of Pacific Rim Universities (APRU) which was financially supported by Google.

Cybersecurity

This book is the first of its kind to introduce the integration of ethics, laws, risks, and policies in cyberspace. The book provides understanding of the ethical and legal aspects of cyberspace along with the risks involved. It also addresses current and proposed cyber policies, serving as a summary of the state of the art cyber laws in the United States. It also, importantly, incorporates various risk management and security strategies from a number of organizations. Using easy-to-understand language and incorporating case studies, the authors begin with the consideration of ethics and law in cybersecurity and then go on to take into account risks and security policies. The section on risk covers identification, analysis, assessment, management, and remediation. The very important topic of cyber insurance is covered as well—its benefits, types, coverage, etc. The section on cybersecurity policy acquaints readers with the role of policies in cybersecurity and how they are being implemented by means of frameworks. The authors provide a policy overview followed by discussions of several popular cybersecurity frameworks, such as NIST, COBIT, PCI/DSS, ISO series, etc.

Media & Entertainment Law

Media & Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industries both in terms of its practical application and its theoretical framework, providing a broad and comprehensive coverage of these fast changing branches of the law. Fully restructured to complement how media law is taught today in the digital age, this third edition explores recent updates in the law including the outcomes of the Google Spain case and the 'right to be forgotten', the use of drones in breach of privacy laws, internet libel and the boundaries of media freedom and press regulation following the Leveson inquiry. Media & Entertainment Law uses the most up-to-date authorities to explore privacy and confidentiality subjects, such as the Prince Charles 'black spider' letters, the Maximilian Schrems and the celebrity superinjunction PJS v Newsgroup Newspapers cases. The book also covers defamation, contempt of court and freedom of information, plus Scots law. New to this edition: A brand new chapter is dedicated to exploring technology and the media, including contemporary issues such as the dark web, the surveillance state, internet censorship and the law and social media, including bloggers, vloggers and tweeters. The chapters on regulatory authorities have been expanded to provide greater clarification and explanation of broadcasting, press and advertising regulation, including the protection of journalistic sources and comparisons with EU Law. The chapter on intellectual property and entertainment law has been streamlined to match media law courses more effectively. This text provides students with detailed coverage of the key

principles, cases and legislation as well as a critical analysis of this vibrant subject.

INFORMATICS

The book provides an overview of the basic concepts of informatics. Dealing with the concerns and issues of digital technology, the text has been written with the objective of introducing students with the tools and applications of information technology, highlighting its use by the digital society. It creates awareness on the nature of emerging digital knowledge society and social issues. Organized into six chapters, the book explains the fundamentals of informatics, besides sharing and analyzing the consequences of rapid computerization. Beginning with an overview of information technology explaining evolution of computers, computer classification, computer hardware and networking, the book moves to the Internet which is considered as a knowledge repository. It then explains IPR, copyright, patents and software license agreement. The book also highlights and discusses social informatics, e-Governance, applications of informatics in various subject areas and futuristic IT. The book is primarily intended as a text for undergraduate and postgraduate students of various disciplines wherein 'Informatics' is prescribed as a core or foundation course. The book will also be of immense use to general readers who are interested in knowing the applications of information technology. Key Features 1. Provides updated information as per the course curriculum of many universities. 2. Includes labeled and immaculate illustrations for clear understanding of the concepts. 3. Chapter-end review questions to reinforce to concepts understanding and to help students prepare for examinations. 4. Presents an extensive glossary of technical terms. Solution Manual is available for adopting faculty.

Historic Documents of 2018

Published annually since 1972, the Historic Documents series has made primary source research easy by presenting excerpts from documents on the important events of each year for the United States and the World. Each volume pairs original background narratives with well over 100 documents to chronicle the major events of the year, from official reports and surveys to speeches from leaders and opinion makers, to court cases, legislation, testimony, and much more. Historic Documents is renowned for the well-written and informative background, history, and context it provides for each document. Each volume begins with an insightful essay that sets the year's events in context, and each document or group of documents is preceded by a comprehensive introduction that provides background information on the event. Full-source citations are provided. Readers have easy access to material through a detailed, thematic table of contents, and each event includes references to related coverage and documents from the last ten editions of the series. Events covered in the 2018 Edition include: Historic U.S. and South Korean diplomatic advances with North Korea Investigation of Russian influence in U.S. elections Chinese constitutional changes granting presidential terms for life March for Our Lives and gun control demonstrations Changes to U.S. immigration and trade policies Legalization of marijuana in Canada Resignation of Australian prime minister Pope declares death penalty inadmissible Volumes in this series dating back to 1972 are available as online editions on SAGE Knowledge.

Protecting Location Privacy in the Era of Big Data

This book examines the uses and potential risks of location-based services (LBS) in the context of big data, with a focus on location privacy protection methods. The growth of the mobile Internet and the popularity of smart devices have spurred the development of LBS and related mobile applications. However, the misuse of sensitive location data could compromise the physical and communication security of associated devices and nodes, potentially leading to privacy breaches. This book explores the potential risks to the location privacy of mobile users in the context of big data applications. It discusses the latest methods and implications of location privacy from different perspectives. The author offers case studies of three applications: statistical disclosure and privacy protection of location-based big data using a centralized differential privacy model; a user location perturbation mechanism based on a localized differential privacy model; and terminal location

perturbation using a geo-indistinguishability model. Linking recent developments in three-dimensional positioning and artificial intelligence, the book also predicts future trends and provides insights into research issues in location privacy. This title will be a valuable resource for researchers, students, and professionals interested in location-based services, privacy computing and protection, wireless network security, and big data security.

How Do I Improve My Grades In GCSE Writing?

A clear, concise revision guide to boost your grade, written by a tutor who is familiar with the requirements of the new GCSE examination. It is so simple you can use it for last minute revision. The skills and requirements for the GCSE English language exam are very specific: retrieving information from texts, inference, analysis of language, presentational techniques and comparing texts are some of the skills needed. For writing, students are required to engage the reader and produce a response, which relates to the purpose and audience. This book teaches students how to write using different purposes - to inform, explain, argue, advise, describe, persuade, review and how to make the tone and register of their writing suitable for the audience. It emphasises the P.E.E or P.E.T.E.R technique, so students have a blue print (format) to work from; make POINT, give EVIDENCE, comment on TECHNIQUE, EFFECT and RESPONSE. This helps students to develop analytical skills for non-fiction tasks and responses in English literature papers. The students are also taught to use rhetorical techniques - groups of three, speaking directly to the reader, rhetorical questions, inclusive pronouns as well as stylistic devices like similes, metaphors and high level vocabulary. The aim of this book is: - To help every child gain a grade C in GCSE English. - To outline the requirements of the present GCSE course and to teach students to structure and organise a piece of writing - To teach students to look for key words in a task and to plan a suitable response. - To teach students to use linguistic and stylistic devices. - To show them how to use rhetorical techniques. - To teach P.E.E techniques and to teach the analytical skills required for English language and literature tasks. - To teach good spelling, punctuation and grammar.

The Cryptocurrency and Digital Asset Fraud Casebook, Volume III

Cryptocurrencies and digital assets have continued to gain widespread acceptance from both retail and institutional investors. Alongside this rapid growth, the digital ecosystem remains plagued by bad actors who prey on the space. These range from state-sponsored North Korean hacker groups, Russian ransomware gangs, multinational organized criminal enterprises to lower-level Chinese gangsters and run of the mill romance scammers. These criminals indiscriminately target victims across all demographics. Furthermore, cryptocurrency-related scams continue to present increasingly significant threats to institutions and national security. Since the publication of The Cryptocurrency and Digital Asset Fraud Casebook volumes I and II, scammers have only intensified the sophistication and scope of their attacks. This evolving threat landscape, coupled with a rapidly changing regulatory environment, underscores the ongoing need for up-to-date information and analysis. The Cryptocurrency and Digital Asset Fraud Casebook, Volume III: Exchange Hacks, Deepfakes, Social Media, and Artificial Intelligence Scams is essential reading for anyone seeking the latest insights into fraudulent activity within the cryptocurrency and digital asset space.

SOCIAL NETWORK ADDICTION PART 1

Social networking sites are part and parcel of the modern lifestyle, but excess of any thing leads to addiction, same applies with the social networking.This work deal with Social networking addiction.

Reuse, Misuse, Abuse

In contemporary culture, existing audiovisual recordings are constantly reused and repurposed for various ends, raising questions regarding the ethics of such appropriations, particularly when the recording depicts actual people and events. Every reuse of a preexisting recording is, on some level, a misuse in that it was not

intended or at least anticipated by the original maker, but not all misuses are necessarily unethical. In fact, there are many instances of productive misuse that seem justified. At the same time, there are other instances in which the misuse shades into abuse. Documentary scholars have long engaged with the question of the ethical responsibility of documentary makers in relation to their subjects. But what happens when this responsibility is set at a remove, when the recording already exists for the taking and repurposing? Reuse, Misuse and Abuse surveys a range of contemporary films and videos that appropriate preexisting footage and attempts to theorize their ethical implications.

Proceedings of the 2023 International Conference on Image, Algorithms and Artificial Intelligence (ICIAAI 2023)

This is an open access book. Scope of Conference 2023 International Conference on Image, Algorithms and Artificial Intelligence (ICIAAI2023), which will be held from August 11 to August 13 in Singapore provides a forum for researchers and experts in different but related fields to discuss research findings. The scope of ICIAAI 2023 covers research areas such as imaging, algorithms and artificial intelligence. Related fields of research include computer software, programming languages, software engineering, computer science applications, artificial intelligence, Intelligent data analysis, deep learning, high-performance computing, signal processing, information systems, computer graphics, computer-aided design, Computer vision, etc. The objectives of the conference are: The conference aims to provide a platform for experts, scholars, engineers and technicians engaged in the research of image, algorithm and artificial intelligence to share scientific research results and cutting-edge technologies. The conference will discuss the academic trends and development trends of the related research fields of image, algorithm and artificial intelligence together, carry out discussions on current hot issues, and broaden research ideas. It will be a perfect gathering to strengthen academic research and discussion, promote the development and progress of relevant research and application, and promote the development of disciplines and promote talent training.

Data Science for Migration and Mobility

Data Science for Migration and Mobility provides an interdisciplinary introduction to the usage of new data sources in migration and mobility research, including mobile phone records, social media content, satellite images, event and financial databases.

Mastering Communications - How CEOs and Executives Can Build a Great Reputation in the Digital Age

What is the winning formula for creating a successful brand and become effective leaders? How can I build a great reputation and stand out in the new digital era? These are only some of the challenges that CEOs and executives are confronted with on a daily basis when it comes to their approach to communications. In his latest book, Mastering Communications, Oliver Aust helps readers navigate the difficult world of communications. Mastering Communications combines theoretical knowledge and practical expertise to guide you step by step, through every skill that every CEO must master to become a top communicator. From designing an effective strategy to managing a reputational crisis, Mastering Communications provides CEOs and senior executives with the necessary tools to communicate with grace and skill in any situation.

Talking with Serial Killers: The Sinister Study of Stalkers

After over twenty-five years interviewing the most dangerous contemporary serial killers, bestselling true crime author Christopher Berry-Dee explores the darkest corners of these thrill-killers' minds in Talking with Serial Killers: The Sinister Study of Stalkers. As law-enforcement authorities, including the FBI's elite Behavioral Science Unit, will confirm, the majority of sexual psychopaths gain most of their perverse thrills from the stalking of their unexpecting victims. The target has often been followed and watched for weeks or

even months, and sometimes even visited before they are attacked. But the actual kill is frequently less satisfying than the pursuit, after which the murdered victim is usually abandoned or thrown away. Exhaustively studying the case histories of more than sixty modern-day sexually motivated serial murderers—some still alive, others subsequently executed—Berry-Dee zeroes in on the Internet porn industry as one of the main motivating drivers in cultivating fantasy stalking, which can lead to multiple rapes and homicides graduating to serial murder. Even more chilling, anyone who is active on social media has a higher potential to be a stalker's next target.

Substance Use and Misuse in sub-Saharan Africa

This book brings together scholars from across the behavioural sciences and public health to examine substance use in Sub-Saharan Africa. Divided into two parts, the first chapters examine aetiology, signs and symptoms, risk factors, impact, and psychosocial challenges relating to use of conventional drugs, among others. The second section focuses on prevention and intervention strategies to curtail substance abuse. The authors provide a research-informed, practical resource on sustainable community health concepts, procedures and practices for addressing substance use for the health and wellbeing of partner communities. The prevention and intervention strategies discussed include a comprehensive consideration of context-specific behavioural, environmental, psychosocial and cultural factors that may affect substance use. The chapters examine various aspects of use including, dependency, intoxication, and withdrawal in tobacco, alcohol, marijuana, and other substances. The book provides a research-informed, practical resource that will appeal to students and scholars of psychology, psychiatry and public health; as well as to policymakers and practitioners in the fields of addiction, development and allied health.

Decisions and Orders of the National Labor Relations Board

Decisions and Orders of the National Labor Relations Board, Volume 359, September 28, 2012, Through July 16, 2013

Contemporary Issues in Social Media Marketing

Contemporary Issues in Social Media Marketing provides the most cutting-edge findings in social media marketing, through original chapters from a range of the world's leading specialists in the area. This second edition has been fully updated with new features such as discussion questions, global case studies and examples, and material reflecting the key trends in the field, including: The growth in user-generated content. The growing influence of AI in content creation, including virtual influencers. The development and utilization of social media analytics. The use of social media as the primary search engine. The relationship between social media and the customer experience of the brand. Highly regarded for its breadth of topics, range of perspectives and research-based approach, this text is perfect recommended reading for advanced undergraduate and postgraduate students studying Digital and Social Media Marketing, Contemporary Issues in Marketing and Strategic Marketing. It will also be valuable reading for academics in the field and reflective practitioners.

Decisions and Orders of the National Labor Relations Board

This book was developed to address a need. Quantitative Literacy courses have been established in the mathematics curriculum for decades now. The students in these courses typically dislike and fear mathematics, and the result is often a class populated by many students who are unmotivated and uninterested in the material. This book is a text for such a course; however, it is focused on a single idea that most students seem to already have some intrinsic interest in and is written at an accessible level. It covers the basic ideas of discrete probability and shows how these ideas can be applied to familiar games (roulette, poker, blackjack, etc.). The gambling material is interweaved through the book and introduced as soon as the necessary mathematics has been developed. Throughout, mathematical formalism and symbolism have been

avoided, and numerous examples are provided. The book starts with a simple definition of probability, goes through some basic concepts like combining events and expected value, and then discusses some elementary mathematical aspects of various games. Roulette is introduced very early on, as is the game of craps, which requires some knowledge of conditional probability. Other games like poker, blackjack, and lotteries, whose study requires some rudimentary combinatorics, come shortly thereafter. The book ends with a brief introduction to zero-sum games, with some attention paid to the use of these ideas in studying bluffing. In addition to discussion of these traditional games, the author motivates probability by talking about a few applications in legal proceedings that illustrate how mathematics has been misused in the courtroom. There is also a discussion of the Monty Hall problem, a nonintuitive result in probability that has an interesting and colorful history. Hopefully, students studying from this text will find that mathematics is not as horrible as they have always thought and offers some interesting applications in the real world. This should perhaps be the goal of any quantitative literacy course.

Quantitative Literacy Through Games and Gambling

Leaderships Big Idea is a treasure map and masterpiece, a must-read for anyone leading in the 21st Century. Pro. John F. Shao MD, Msc, Ph.D. Former Vice Chancellor of Tumaini University & Executive Director of Kilimanjaro Christian Medical Center.

Leadership's Big Idea

Practical reference on the latest sensory and consumer evaluation techniques available to professionals and academics working in food and consumer goods product development and marketing This unique manual describes how to implement specific sensory and consumer methods based on context and objective. Presented in a direct and straightforward language that will speak to the industry professionals and academics who are on the ground attempting to solve technical questions, it reviews, step by step, the various stages of a product evaluation. Included are practical examples from many industries that practitioners can relate to. The book also shows how to build a sustainable short-, medium-, and long-term product evaluation strategy, and guides readers on how to create customized methods, or even completely new approaches. Consumer and Sensory Evaluation Techniques speaks to management and decision-makers within organizations and addresses the main questions (eg: \"How much will it cost?\" and \"How quickly can it be achieved?\") that are faced when developing and testing new products before a launch. Chapters cover: the pillars of good consumer and sensory studies; sensory profile of a product: mapping internal sensory properties; the foundations of consumer evaluation; study plans and strategy—sustainable short, mid and long-term vision; real-life anticipation with market factors: concept, price, brand, market channel; and internal studies versus sub-contracting. Uses examples from multiple sectors to show how to build a sustainable product evaluation strategy Analyses the critical milestones to follow and the pitfalls to avoid Supports the decision-making process while developing fast yet robust test strategies that will increase the likelihood of a product's success Consumer and Sensory Evaluation Techniques is the perfect resource for students, faculty and professionals working in product development, including formulators and marketers.

Consumer and Sensory Evaluation Techniques

As nations have aggressively implemented a wide range of mechanisms to proactively curb potential threats terrorism, Counter-Terrorism Laws and Freedom of Expression: Global Perspectives offers critical insight into how counter-terrorism laws have adversely affected journalism practice, digital citizenship, privacy, online activism, and other forms of expression. While governments assert the need for such laws to protect national security, critics argue counter-terrorism laws are prone to be misappropriated by state actors who use such laws to quash political dissent, target journalists, and restrict other forms of citizen expression. The book is divided into three parts. Part I deals with the politics and discourse of counter-terrorism laws. Part II focuses on the ways counter-terrorism laws have impacted journalistic practice in different countries, with effects ranging from imprisonment of reporters to self-censorship. Part III addresses how counter-terrorism

laws have been used to target everyday citizens, social media activists, whistleblowers, and human rights advocates around the world. Together, the chapters address how counter-terrorism laws have undermined democratic values in both authoritarian and liberal political contexts. Scholars of political science, communication, and legal studies will find this book particularly interesting.

Counter-Terrorism Laws and Freedom of Expression

The Regulation of Corporate Disclosure is a one-volume treatise on the disclosure regime in place under the Federal securities laws. The treatise addresses the formal disclosure process (periodic reports, MD&A, Regulation FD), the informal disclosure process (press releases, social media, discussions with analysts), and the application of the antifraud provisions to these communications. The treatise includes chapters on scienter and materiality, and also addresses communications with and disclosure obligations to shareholders. The Fourth Edition has been significantly revised and, among other topics, includes coverage of: The duties and responsibilities of corporate officials relating to the disclosure process The most recent cases addressing disclosure issues, including decisions by the Supreme Court on topics such as the application of the antifraud provisions to beliefs and opinions Pronouncements by the U.S. Securities and Exchange Commission on disclosure issues, including consideration of the SEC's efforts to improve disclosure effectiveness The developing need to consider disclosure of public interest matters, including the effects of climate change on a company's business The disclosure requirements applicable to the proxy process, including the system for uncovering the identity of street name owners State disclosure obligations of the board of directors under its fiduciary obligations to shareholders.

Regulation of Corporate Disclosure, 4th Edition

'As a pioneer in the age when social media has become India's new political pulpit and argumentative townsquare, Ankit Lal is perfectly poised to chronicle India's transformational tryst with Twitter and Facebook and whatever comes next.' – SHEKHAR GUPTA, senior journalist and recipient of the Padma Bhushan 'This book is a must-read for anyone who wants to understand how social media has shaped India in the past decade.' – ARVIND KEJRIWAL, chief minister, Delhi In India Social, social media activist and influencer Ankit Lal takes a deep dive into India's biggest social media campaigns and analyses how, in just the last ten years, platforms like Facebook, Twitter, YouTube and WhatsApp have changed the way Indians engage with politics, popular culture and social revolution. From the 2008 Mumbai terror attacks, which unleashed the potential of the medium, to the 2012 #IndiaAgainstCorruption protests; from the rage-filled Justice for Nirbhaya movement to the citizen-driven fight for a free Internet with the #NetNeutrality campaign; from the controversial #AIBRoast to WhatsApp becoming the primary tool used to spread the agenda and ideology of major political parties – India Social unravels, for the first time, the behind-the-scenes stories of the most influential social media movements of the past decade. Incisive and insightful, India Social is the story of how they began, why they spread and the way they have reshaped democratic life in India.

India Social

This book explores the evolution of the current U.S. research and development enterprise, asks whether this organization remains appropriate to the challenges we face today, and proposes strategies for better preparing for the global technology race shaping our future. Across the globe, nation states and societies, as well as corporations, technology developers, and even individuals, find themselves on the front lines of a global technology race. In the third decade of this century, the outlines of the contest have become clear. R&D spending, new methods such as innovation centers, and powerful technologies in governments and society are rapidly proliferating. Technology winners and losers are emerging. How did we arrive at this global technology fight? How and where will it be waged? What can we do to prepare for the future? Tech Wars examines the conditions that have led us to this point and introduces new strategies, organizational changes, and resource allocations that will help the United States respond to the challenges on the horizon.

Tech Wars

This book is composed of a selection of articles from The 2021 World Conference on Information Systems and Technologies (WorldCIST'21), held online between 30 and 31 of March and 1 and 2 of April 2021 at Hangra de Heroismo, Terceira Island, Azores, Portugal. WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges of modern information systems and technologies research, together with their technological development and applications. The main topics covered are: A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human–Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; N) Technologies for Biomedical Applications.

Trends and Applications in Information Systems and Technologies

Copy – Web Catalog: Emerging Perspectives on Substance Misuse addresses theoretical, practice and policy issues with regard to the problematic use of alcohol and illegal drugs. Comprises chapters from some of the most internationally well-known academics and practitioners representing a range of different specializations and perspectives in the field Presents a wide range of emerging evidence-based perspectives Includes content relevant for researchers, practitioners, and policy makers who work with individuals or policy related to drug and alcohol misuse Areas covered include - gender and substance use, working with children and families of substance misusers and the emerging recovery movement

Emerging Perspectives on Substance Misuse

Herein, an interdisciplinary group of scholars analyze the possible technological impacts on civil society's development, drawing upon the «Horizon Scanning» methodology. The overarching aim of this collection is to broaden the spectrum of the social and technical imaginare. One specific objective is to analyze how technological advancements may influence the development of civil society in Russia, the former Soviet Union, and Central and Eastern Europe. A second is to assist those involved in such issues to make decisions in the context of possible future development scenarios.

Horizon Scanning. The Role of Information Technologies in the Future of Civil Society

Substance Misuse and Young People: Critical Issues is a comprehensive source of information on young people's requirements for assessment, treatment and other interventions because of their misuse of substances. It highlights approaches that enhance understanding of the routes that lead young people to substance misuse and also the routes away from it. The emergence of new substances and methods of misuse makes this ever more relevant. The authors are international experts in the fields of psychiatry, paediatrics, medicine, psychology, genetics, resilience, neuropharmacology and epidemiology. This book acknowledges how widespread both substance misuse and psychiatric disorders are and explores the complex, challenging links between co-occurring conditions. Use of substances is associated with illness and premature mortality, and more so for people who have combined disorders. The authors critically assess the vital need for intervention during adolescence and early adulthood. They provide detailed clinical views of the psychosocial interventions and medications currently available and illustrate them with case studies that emphasise adolescents' experiences and thoughtful lifestyle-specific interventions. This book provides theoretical knowledge and indicates the practical skills that practitioners require for work with young people who misuse substances. It is highly applicable to medical practitioners, psychologists, pharmacists, social workers, police officers, probation officers, educationalists and related social and healthcare professionals.

Substance Misuse and Young People

This Handbook focuses on the complex relationship between entrepreneurship and conflict. Editors Wim Naudé and Bernadette Power construct a broad overview of central research themes in the field, covering states being captured by entrepreneurs, states capturing businesses, entrepreneurship in post-conflict reconstruction, and entrepreneurs in conflict against other entrepreneurs.

Handbook of Research on Entrepreneurship and Conflict

In the last few years, social media has become the primary way of communicating, not only among friends and colleagues but also between employers and employees and between companies and consumers. For employers, the phenomenon offers great opportunities, but also concomitant dangers due primarily to use of social media by employees and employees' representatives. Written in the context of employment laws as well as privacy laws, this book surveys the state of the law in over thirty key jurisdictions, including most of the developed countries of Europe, Asia, and North America and major developing countries worldwide. The publication arose from a seminar prepared by the editors and others at which it was clearly identified that internationally operating employers need a comprehensive and user-friendly multinational summary on employment and labour law questions arising in connection with the use of social media. The book is divided into country chapters, each written by a known local specialist. In order to easily 'navigate' through the issues for each country, the chapters follow a uniform structure, covering the applicable statutory regimes, case law, useful checklists, and recommendations. Among the issues and topics dealt with are the following: - employees' entitlement to use social media at the workplace; - whether employers can require the use of social media by employees; - right of employers to monitor employees' use of social media outside the workplace; - employers' potential liability for employees' misuse of social media; - right of employee representatives to use employers' equipment for social media purposes; - employers' remedies against misuse of social media by employees and employee representatives; - development and drafting of a social media policy; and - role of social media in employer–employee disputes. No other publication exists providing interested parties with a practical and strategic guide to legal issues affecting the use of social media in the workplace. With its easy-to-use country-by-country format and its expert recommendations, this unique resource will prove itself as an incomparable handbook for lawyers, human resources professionals, and in-house counsel advising or working for internationally operating businesses. It will also be of inestimable value for academics and policymakers concerned with the legal ramifications of social media use in the workplace.

Social Media and Employment Law: An International Survey

International Business Law: In the New Cyberworld Edward J. Swan Conducting successful international business in the modern electronically communicating world requires a wide range of tools of international cooperation in order to ensure reasonable and effective laws and regulations governing the cyber business world, as well as to avoid, and if necessary resolve, conflicts and miscommunications that inevitably arise. This is the first book to provide a comprehensive overview of legal measures to regulate cyber commerce around the globe, with detailed coverage of the world's major markets and a legal and regulatory review, both national and international, of digital penetration of the world's major business sectors. In a thoroughly researched survey of currently applicable e-commerce law across the globe, the author describes and analyzes such aspects as the following: international laws and conventions affecting cyber business; law of international contracts; privacy and data protection issues, including cybercrime, cyberwar, bribery, and corruption; and intellectual property and competition. There are individual chapters for major jurisdictions, including the European Union, the United States, the United Kingdom, France, China, India, Japan, South Korea, Singapore, the United Arab Emirates, and Saudi Arabia. Businesses and their in-house counsel, as well as lawyers advising or adjudicating business-related legal issues, will greatly appreciate the book's in-depth description and analysis of how enforceable business agreements are formed, how they can be enforced, and how many legal jurisdictions one's business is reaching and how the legal requirements of each

jurisdiction will affect one's agreements and one's business expectations.

International Business Law

It is inevitable, given the enormous media-driven concern generated by the recent application of artificial intelligence (AI) to an ever-expanding spectrum of day-to-day human experience, that the need for a clearly articulated legal response has become imperative. This book both clarifies the controversial issues surrounding the use of AI and explores in great detail how, far from being "unregulated," the creation, distribution, and operation of AI systems currently is, and will remain, subject to a vast array of existing laws and regulations all over the world. Demonstrating beyond any doubt that the traditional concepts of legal responsibility, including duty of care, negligence, and compensation for damages, will always be applicable to those humans who create and/or use artificially intelligent things or systems, the author shows how AI systems are clearly implicated in numerous existing legal regimes, including the following: relevant provisions under international law and EU law; applicable provisions in the laws of the United States, the United Kingdom, France, China, India, Japan, South Korea, and Singapore; and numerous national provisions in the legal fields of health and safety, intellectual property, competition, privacy and data protection, and military engagement. However, given the lack of international consensus on this vitally important issue, the author suggests that any worldwide agreement on the legal responsibilities relating to the use of AI will need to be carefully defined, and that provisions will need to be reviewed to determine how they will apply to any new range of artificially intelligent creations. The purpose of this book is to review those legal concepts, throughout the world, that currently govern the application of AI and to comment on modifications or extensions of the rule of law that are being proposed as necessary to serve and protect humanity in relation to the expanding applications of AI. It is important that anyone who uses or is affected by AI products understands the relationship between existing laws and regulations in major markets around the world and those areas where initial regulations may be required. For them, for their counsel, and for the various policy and regulatory authorities confronted with AI issues, this book will prove an essential guide.

Artificial Intelligence Law

This book is an authoritative discussion of user comments and moderation in digital journalism, examining how user comments have disrupted the field of journalism and how a growing number of news organizations have abandoned commenting features altogether. Making a broad argument concerning user commentary as a manifestation of user engagement and public deliberation, User Comments and Moderation in Digital Journalism: Disruptive Engagement conceptualizes the act of commenting as interactive engagement and participation in a virtual public sphere. The book also explores the organizational policies that have the potential to disrupt – as well as improve – the quality of user discussions. Ultimately, strategies are proposed for managing and improving user comments and encouraging more productive public deliberation in digital journalism. This engaging discussion of a key development in digital journalism is a valuable resource for academics and researchers in the areas of journalism, media and communication studies.
