Venom, also known formally as "The Symbiote", is a character appearing in American comic books published by Marvel Comics. The character is a sentient alien symbiote with an amorphous, liquid-like form, who survives by bonding with a host, usually human. This dual-life form receives enhanced powers and usually refers to itself as "Venom". The symbiote was originally introduced as a living alien costume in *The Amazing Spider-Man* #252 (May 1984), with a full first appearance as Venom in *The Amazing Spider-Man* #300 (May 1988).

The Venom symbiote's first human host was Spider-Man himself, who eventually discovered its true nefarious nature and separated himself from the creature in *The Amazing Spider-Man* #258 (November 1984)—with a brief rejoining five months later in *Web of Spider-Man* #1.

The symbiote went on to merge with other hosts, beginning with Eddie Brock, its second host, with whom it first became Venom. Venom has endured as one of Spider-Man's most prominent villains, and was initially regarded as one of his three archenemies, alongside the Green Goblin and Doctor Octopus. Since his debut however, Venom has evolved into an antiheroic figure, slowly distancing himself from his initial goal to ruin Spider-Man's life to try and do good instead, even putting aside his differences with and helping Spider-Man at times. In 1993, Venom would transition into having a role as an antihero vigilante in the *Venom: Lethal Protector* comic book series.

After Brock, numerous other hosts for Venom followed, including the villain Mac Gargan, who was the main incarnation of Venom from 2005 to 2009, and Flash Thompson, who became the superhero Agent Venom from 2011 to 2016, before Venom returned to Brock in 2017, with Brock's biological son Dylan Brock becoming Venom's next host in 2021. In *All-New Venom* in 2025, Dylan's foster mother Mary Jane "MJ" Watson succeeds the Brocks as Venom's new host. Venom is also depicted as having spawned several children—Scream, Lasher, Phage, Agony, Riot, Mania, Sleeper, and Carnage, the last of whom becomes Venom's archenemy after bonding with serial killer Cletus Kasady.

A fan-favorite character and well-known figure in popular culture, Venom (primarily the Eddie Brock incarnation) is the most recognizable Spider-Man antagonist not first introduced during the original Lee/Ditko run. He has been featured in various media adaptations of Spider-Man over the years, including feature films, television series and video games. The character was portrayed by Tobey Maguire and Topher Grace in *Spider-Man 3* (2007), with Tom Hardy primarily portraying the character in the Sony's Spider-Man Universe films *Venom* (2018), *Venom: Let There Be Carnage* (2021), and *Venom: The Last Dance* (2024), as well as an uncredited post-credit scene appearance in the Marvel Cinematic Universe film *Spider-Man: No Way Home* (2021).

The Eddie Brock incarnation of Venom is among Spider-Man's most famous rogues, and is regarded by many as a dark reflection of the hero. Comics journalist and historian Mike Conroy writes of the character: "What started out as a replacement costume for Spider-Man turned into one of the Marvel web-slinger's greatest nightmares." Venom was rated 33rd on Empire's 50 Greatest Comic Book Characters, and ranked 22nd on IGN's 100 Greatest Comic Villains of All Time.

Toronto Raptors

prospects: Beavers, Bobcats, Dragons, Grizzlies, Hogs, Raptors, Scorpions, T-Rex, Tarantulas, and Terriers. The final selection—Toronto Raptors—was unveiled

The Toronto Raptors are a Canadian professional basketball team based in Toronto. The Raptors compete in the National Basketball Association (NBA) as a member of the Atlantic Division of the Eastern Conference. The team plays its home games at Scotiabank Arena, which it shares with the Toronto Maple Leafs of the National Hockey League (NHL). The team was founded in 1995 as part of the NBA's expansion into Canada, along with the Vancouver Grizzlies. Since the 2001–02 season, the Raptors have been the only Canadian team in the league, as the Grizzlies relocated from Vancouver to Memphis, Tennessee.

As with most expansion teams, the Raptors struggled in their early years, but after the acquisition of Vince Carter through a draft-day trade in 1998, the franchise set league-attendance records and made the NBA playoffs in 2000, 2001, and 2002. Carter was instrumental in leading the team to their first playoff series win in 2001, where they advanced to the Eastern Conference semifinals. During the 2002–03 and 2003–04 seasons, they failed to make significant progress, and Carter was traded in 2004 to the New Jersey Nets.

After Carter's departure, Chris Bosh emerged as the team leader. For the 2006–07 season, Bryan Colangelo was appointed as general manager, and through a combination of Bosh, 2006 first overall draft pick Andrea Bargnani, and a revamp of the roster, the Raptors qualified for their first playoff berth in five years, capturing the Atlantic Division title. In the 2007–08 season, they also advanced to the playoffs but failed to reach the postseason in each of the next five seasons. Colangelo overhauled the team's roster for the 2009–10 season in a bid to persuade pending free agent Bosh to stay, but Bosh departed to sign with the Miami Heat in July 2010, ushering in yet another era of rebuilding for the Raptors.

Masai Ujiri replaced Colangelo in 2013 and helped herald a new era of success, led by a backcourt duo of DeMar DeRozan and Kyle Lowry. The Raptors returned to the playoffs the following year and became a consistent playoff team in every year of Ujiri's tenure. Under Ujiri, the team also won five Division titles and registered their most successful regular season in 2018. However, the team's failure to reach the NBA Finals prompted Ujiri to fire head coach Dwane Casey after the 2018 playoffs concluded and to trade DeRozan for Kawhi Leonard and Danny Green later that summer, as well as to acquire Marc Gasol before the trade

deadline. Toronto also saw the break-out of Pascal Siakam, the 27th overall pick in the 2016 NBA draft, who won the NBA Most Improved Player that year. In the 2019 playoffs, the Raptors won their first Eastern Conference title and advanced to their first NBA Finals, where they won their first NBA championship.

After the Raptors won their first championship, Leonard left in free agency. After Lowry's departure via trade in 2021, Siakam became the face of the franchise until 2024 when Siakam was traded to the Indiana Pacers, leaving Scottie Barnes as the new face of the franchise.

Doctor Octopus (Dr. Otto Octavius), also known as Doc Ock for short, is a fictional character appearing in American comic books published by Marvel Comics. The character was created by Stan Lee and Steve Ditko and first appeared in *The Amazing Spider-Man* #3 (July 1963). He is a highly intelligent, myopic, and stocky mad scientist who sports four strong and durable appendages resembling an octopus's tentacles, which extend from his body and can be used for various purposes. After his mechanical harness became permanently fused to his body during a laboratory accident, he turned to a life of crime, and came into conflict with the superhero Spider-Man. He has endured as one of Spider-Man's most prominent villains, and is regarded as one of his three archenemies, alongside the Green Goblin and Venom. He is the founder and leader of the Sinister Six, the first supervillain team to oppose Spider-Man.

While usually portrayed as a supervillain, Doctor Octopus has also been occasionally depicted as a conflicted antihero and ally of Spider-Man. Following Spider-Man's death in the 2012 storyline "Dying Wish", which saw a dying Octavius swapping bodies with the hero and letting him die in his original body, Octavius was motivated to prove he could be a better Spider-Man. As such, he adopted the Superior Spider-Man alias, introduced in *Avenging Spider-Man* #15.1 following a cameo in *Daredevil* vol. 3 #21 (both December 2012), as the fourth predominant main continuity Spider-Man. The Superior Spider-Man possesses all of the original Spider-Man's abilities, memories, and equipment, along with additional gadgets created by Octavius, though he often struggles to live up to his predecessor's legacy and seeks to turn his life around after being a villain for years.

In 2013, Marvel launched a 33-issue *The Superior Spider-Man* comic book series focusing on the character's redemption and superhero career. The original Spider-Man has since been resurrected after the death of Otto Octavius. Following *Spider-Verse*, a copy of his consciousness became a villain, though a second volume of *The Superior Spider-Man* launched in 2018 saw the duplicate taking on the mantle and the new name Dr. Elliot Tolliver before returning to the Doctor Octopus mantle as an antihero, having his soul restored and memories of redemption erased by Mephisto, before returning to the role of Superior Spider-Man in 2023 in a new series by Dan Slott, and *Spider-Man: Octo-Girl* by Hideyuki Furuhashi and Betten Court.

Comics journalist and historian Mike Conroy writes of the character: "Created by Stan Lee and artist Steve Ditko, Doc Ock, as he became known, has become one of the web-slinger's most persistent, enduring, and dangerous foes." A fan-favorite character and well-known figure in popular culture, Doctor Octopus has been featured in various media adaptations of Spider-Man over the years, including feature films, television series, and video games. In live-action, Alfred Molina portrayed the character in the films *Spider-Man 2* (2004) and *Spider-Man: No Way Home* (2021). Kathryn Hahn voiced a female version of Doctor Octopus named Olivia Octavius in the animated film *Spider-Man: Into the Spider-Verse* (2018).

In 2009, IGN ranked Doctor Octopus 28th in the Top 100 Comic Book Villains of All Time, and in 2014 rated him Spider-Man's greatest enemy.

The Hand (comics)

The Hand is a supervillain organization appearing in American comic books published by Marvel Comics. The Hand first appeared in Daredevil #174 (September 1981) and was created by writer/artist Frank Miller.

The Hand is an order of evil mystical ninjas who are heavily involved in organized crime and mercenary activities such as assassination plots. The Hand covets power above all other objectives. They are primarily based in Japan, but operate internationally. They were founded in 1588 as a secret society of Japanese nationalist samurai but were soon co-opted by the Snakeroot, an ancient ninja clan which serves a primordial demon known only as "The Beast of the Hand".

Members of the Hand are practitioners of powerful occult magic and can murder a person and bring that person back to life as a servant of the Hand, but a few are known to have reversed this programming. The Hand's most dangerous adversary is The Chaste, a band of warriors once led by Stick, the blind martial arts master and mentor of Matt Murdock, who grew to become the costumed crime-fighter Daredevil. Murdock would eventually, after many bitter battles, accept the offer of becoming the master of the Hand for a time.

The Hand has appeared in the Marvel Cinematic Universe television shows Daredevil, Iron Fist, and The Defenders.
