Jerome ...

Welcome and introduction

Big picture reaction - Powell caved and will cut rates in September

Why rate cuts aren't the right move - interest rates appropriately valued

Inflation destroys economies - 35-40% of workers not getting 3% raises

Path to 2% inflation - pandemic changed everything permanently

Immigration's hidden impact - biggest driver of population growth

Border shutdown changes everything - net negative immigration for first time

Job creation numbers make sense - 35,000 jobs fine with no population growth

Labor force participation - only way to boost jobs is wage inflation

Long bond implications - tremendous flow into fixed income

Risk profile investing - boomers should focus on fixed income

Retail investor dominance - buying every dip since Liberation Day

Will Powell cut? - 90% probability but market wants limited cuts

Supply vs demand problem - for hire signs but no applicants

Biggest risk - tariffs will continue weekly, not one-time event

AI optimism - will eliminate 50 million jobs but create 70 million better ones
