In mathematics, especially in the field of module theory, the concept of pure submodule provides a generalization of direct summand, a type of particularly well-behaved piece of a module. Pure modules are complementary to flat modules and generalize Prüfer's notion of pure subgroups. While flat modules are those modules which leave short exact sequences exact after tensoring, a pure submodule defines a short exact sequence (known as a pure exact sequence) that remains exact after tensoring with any module. Similarly a flat module is a direct limit of projective modules, and a pure exact sequence is a direct limit of split exact sequences.

A pure play company focuses solely on a particular product or activity. Investing in a pure play company can be considered as investing in a particular commodity or product of a company.

Pure play firms either specialize in a specific niche, or have little to no vertical integration. For example, a coffee shop may call itself a "pure play" restaurant, and a factory that only produces goods (not designing or selling to consumers) may refer to itself as a pure play manufactory.

Companies that transact exclusively via e-commerce and have no brick and mortar retail spaces may be referred to as pure play online retailers.

Like rational choice theory, conflict theory, or functionalism, pure sociology is a sociological paradigm — a strategy for explaining human behavior. Developed by Donald Black as an alternative to individualistic and social-psychological theories, pure sociology was initially used to explain variation in legal behavior. Since then, Black and other pure sociologists have used the strategy to explain terrorism, genocide, lynching, and other forms of conflict management as well as science, art, and religion.

In solid mechanics, pure bending (also known as the theory of simple bending) is a condition of stress where a bending moment is applied to a beam without the simultaneous presence of axial, shear, or torsional forces.

Pure bending occurs only under a constant bending moment (M) since the shear force (V), which is equal to

,

$$\left\{\frac{dM}{dx}\right\},$$

has to be equal to zero. In reality, a state of pure bending does not practically exist, because such a state needs an absolutely weightless member. The state of pure bending is an approximation made to derive formulas.

Chemistry

– not all particles have rest mass, such as the photon. Matter can be a pure chemical substance or a mixture of substances. The atom is the basic unit

Chemistry is the scientific study of the properties and behavior of matter. It is a physical science within the natural sciences that studies the chemical elements that make up matter and compounds made of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during reactions with other substances. Chemistry also addresses the nature of chemical bonds in chemical compounds.

In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it provides a foundation for understanding both basic and applied scientific disciplines at a fundamental level. For example, chemistry explains aspects of plant growth (botany), the formation of igneous rocks (geology), how atmospheric ozone is formed and how environmental pollutants are degraded (ecology), the properties of the soil on the Moon (cosmochemistry), how medications work (pharmacology), and how to collect DNA evidence at a crime scene (forensics).

Chemistry has existed under various names since ancient times. It has evolved, and now chemistry encompasses various areas of specialisation, or subdisciplines, that continue to increase in number and interrelate to create further interdisciplinary fields of study. The applications of various fields of chemistry are used frequently for economic purposes in the chemical industry.

Pure Land Buddhism or the Pure Land School (Chinese: 净土宗; pinyin: Jìngtǔzōng) is a broad branch of Mahayana Buddhism focused on achieving rebirth in a Pure Land. It is one of the most widely practiced traditions of Buddhism in East Asia. It is also known as the "Lotus School" (Chinese: 莲宗; pinyin: Liánzōng) in China or the "Nembutsu school" in Japan. East Asian Pure Land mainly relies on three main Mahayana scriptures: the Sutra of Amitayus, the Contemplation Sutra and the Amitabha Sutra.

The Pure Land tradition is primarily focused on achieving rebirth in a Buddha's "pure land", a superior place to spiritually train for full Buddhahood, where one can meet a Buddha face to face and study under them without any of the distractions or fears of our world. Since it is much easier to attain enlightenment in Pure Land, many Mahayana Buddhists strive to be reborn in one. The most popular one today is Sukhavati ("Land of Bliss"), the Pure Land of Buddha Amitābha, though some Buddhists may also aspire to be reborn in other Pure Lands (such as Maitreya's and Medicine Guru's). Although Buddhas are venerated in Pure Land and are seen as savior-like figures, the tradition clearly distinguishes itself from theistic religions, due to its roots in the classic Mahayana understanding of Buddhahood and bodhisattvas, as well as the Buddhist doctrines of emptiness and mind-only.

The most distinctive feature of East Asian Pure Land traditions is that it offers ordinary people (even the unlearned and the unethical) hope that they may attain the stage of non-retrogression and eventually Buddhahood, no matter how bad their karma may be. In East Asian Pure Land, this is most commonly accomplished through the practice of mindfulness of the Buddha, which is called niànfó (Chinese: 念佛, "Buddha recitation", Japanese: nenbutsu) and entails reciting the name of Amitabha (Chinese: 阿弥陀佛, Japanese: Amida). However, Pure Land Buddhism may also include numerous other practices which are done alongside Buddha recitation, such as keeping Buddhist precepts, reciting sutras, visualization, and making offerings.

Pure Land oriented practices and concepts form an important component of the Mahāyāna Buddhist traditions of China, Japan, Korea, Vietnam, the Himalayas and Inner Asian regions such as Tibet. Some East Asian traditions are exclusively Pure Land oriented, especially the Japanese sects like Jōdo-shū and Jōdo Shinshū. In Tibetan Buddhism, prayers and practices which aim at rebirth in a Buddha-field are also a popular religious orientation, especially among laypersons.

Pure alexia, also known as agnosic alexia or alexia without agraphia or pure word blindness, is one form of alexia which makes up "the peripheral dyslexia" group. Individuals who have pure alexia have severe reading problems while other language-related skills such as naming, oral repetition, auditory comprehension or writing are typically intact.

Pure alexia is also known as: "alexia without agraphia", "letter-by-letter dyslexia", "spelling dyslexia", or "word-form dyslexia". Another name for it is "Dejerine syndrome", after Joseph Jules Dejerine, who described it in 1892; however, when using this name, it should not be confused with medial medullary syndrome which shares the same eponym.
