Chi-Chi's

Chi-Chi's is a Belgian restaurant chain and a line of Mexican-styled grocery items owned by MegaMex Foods. The son of one of the original co-founders

Chi-Chi's is a Belgian restaurant chain and a line of Mexican-styled grocery items owned by MegaMex Foods. The son of one of the original co-founders recently revived the brand by preparing to open two restaurants in Minnesota. The name Chi-Chi's can also refer to the legacy Chi-Chi's namesake brand of Mexican food grocery products produced and marketed when the original North American restaurant chain owner sold the rights to use its name on said products in 1987.

The Chi

The Chi (??a?/ SHY) is an American drama television series created by Lena Waithe about life in a neighborhood on the South Side of Chicago. In May 2024

The Chi (SHY) is an American drama television series created by Lena Waithe about life in a neighborhood on the South Side of Chicago. In May 2024, the series was renewed for a seventh season which premiered on May 18, 2025. In May 2025, the series was renewed for an eighth season.

Shang-Chi and the Legend of the Ten Rings

Shang-Chi and the Legend of the Ten Rings is a 2021 American superhero film based on Marvel Comics featuring the character Shang-Chi. Produced by Marvel

Shang-Chi and the Legend of the Ten Rings is a 2021 American superhero film based on Marvel Comics featuring the character Shang-Chi. Produced by Marvel Studios and distributed by Walt Disney Studios Motion Pictures, it is the 25th film in the Marvel Cinematic Universe (MCU). The film was directed by Destin Daniel Cretton from a screenplay he wrote with Dave Callaham and Andrew Lanham, and stars Simu Liu as Shang-Chi alongside Awkwafina, Meng'er Zhang, Fala Chen, Florian Munteanu, Benedict Wong, Yuen Wah, Michelle Yeoh, Ben Kingsley, and Tony Leung. In the film, Shang-Chi is forced to confront his past when his father Wenwu (Leung), the leader of the Ten Rings terrorist organization, draws Shang-Chi and his sister Xialing (Zhang) into a search for a mythical village.

A film based on Shang-Chi entered development in 2001, but work did not begin in earnest until December 2018 when Callaham was hired. Cretton joined in March 2019 and the film's title and primary cast were announced that July. This revealed the film's connection to the Ten Rings organization, which previously appeared throughout the MCU, and its leader Wenwu who was adapted from the problematic comic book characters Fu Manchu and the Mandarin. Shang-Chi and the Legend of the Ten Rings is the first Marvel Studios film with an Asian director and a predominantly Asian cast. Filming began in Sydney in February 2020 but was put on hold in March due to the COVID-19 pandemic. Production resumed in August and ended in October, with additional filming in San Francisco. Brad Allan and other members of the Jackie Chan Stunt Team coordinated the fight sequences.

Shang-Chi and the Legend of the Ten Rings premiered in Hollywood, Los Angeles, on August 16, 2021, and was released in the United States on September 3 as part of Phase Four of the MCU. It grossed over \$432 million worldwide, making it the ninth-highest-grossing film of 2021. It set several box office records and received positive reviews from critics, many of whom praised the exploration and representation of Asian culture which differentiated the film from the rest of the MCU, as well as the action sequences and Leung's

performance. The film received various accolades, including a nomination for Best Visual Effects at the 94th Academy Awards. A sequel is in development.

Chi Chi DeVayne

(September 24, 1985 – August 20, 2020), better known by the stage name Chi Chi DeVayne, was an American drag queen and reality television personality

Zavion Michael Davenport (September 24, 1985 – August 20, 2020), better known by the stage name Chi Chi DeVayne, was an American drag queen and reality television personality who came to international attention on the eighth season of RuPaul's Drag Race and on the third season of RuPaul's Drag Race All Stars. DeVayne began her drag career in her native Shreveport, Louisiana, where she was known locally prior to her 2016 debut on Drag Race. Following her time on the show, DeVayne embarked on a number of domestic and international tours, and she was featured on several web series about drag.

Davenport was diagnosed with scleroderma in 2018 and, two years later, he died following a bout of pneumonia he contracted after a hospital stay for scleroderma-related kidney failure.

Zheng Shang-Chi, also known as the Master of Kung Fu and Brother Hand, is a superhero appearing in American comic books published by Marvel Comics. The character was created by writer Steve Englehart and artist Jim Starlin, debuting in Special Marvel Edition #15 (December 1973) in the Bronze Age of Comic Books, and starring in his own solo title until 1983. Described as the greatest martial artist alive, Shang-Chi has been trained since birth to be the ultimate fighter with a specialization in various unarmed and weaponry-based wushu styles, including the use of the gùn, nunchaku, and jian. Shang-Chi later assumes leadership of the Five Weapons Society and acquires the Ten Rings weapons.

Shang-Chi was spun off from novelist Sax Rohmer's licensed property as the unknown son of fictional villain Dr. Fu Manchu. In later editions, his connection to Manchu was underplayed after Marvel lost the comic book rights to the latter's character; to get around this problem, the publisher eventually renamed Shang-Chi's father Zheng Zu.

Shang-Chi made his live-action debut in the Marvel Cinematic Universe film Shang-Chi and the Legend of the Ten Rings (2021), where he is portrayed by Simu Liu.

Tai chi

Tai chi is a Chinese martial art. Initially developed for combat and self-defense, for most practitioners it has evolved into a sport and form of exercise

Tai chi is a Chinese martial art. Initially developed for combat and self-defense, for most practitioners it has evolved into a sport and form of exercise. As an exercise, tai chi is performed as gentle, low-impact movement in which practitioners perform a series of deliberate, flowing motions while focusing on deep, slow breaths. Often referred to as "meditation in motion", tai chi aims to concentrate and balance the body's purported qi (vital energy), providing benefits to mental and physical health.

Many forms of tai chi are practiced, both traditional and modern. While the precise origins are not known, the earliest documented practice is from Chen Village and Zhabao Village in Henan on the North China Plain, a region where centuries of rebellions, invasions, and adverse economic and social conditions nurtured the development of a wide range of martial arts, including those of the Shaolin Monastery on Mount Song at the western edge of the plain.

Most modern styles trace their development to five traditional schools: Chen, Yang, Wu (Hao), Wu, and Sun. In the early 20th century Yang Chengfu, Wu Jianquan, Sun Lutang, and others promoted and standardized the art for its health benefits in programs supported by the Nationalist government, an approach that was further expanded and institutionalized by the PRC government after 1949. In 2020, tai chi was included in the UNESCO List of Intangible Cultural Heritage of Humanity.

Ho Chi Minh City

Ho Chi Minh City (HCMC; Vietnamese: Thành phố Hồ Chí Minh, IPA: [tʰanʰə fəwʰə həwʰə cʰjʰə mʰnʰə]), also known as Saigon (Vietnamese: Sài Gòn, IPA: [saʰj

Ho Chi Minh City (HCMC; Vietnamese: Thành phố Hồ Chí Minh, IPA: [tʰanʰə fəwʰə həwʰə cʰjʰə mʰnʰə]), also known as Saigon (Vietnamese: Sài Gòn, IPA: [saʰj ʰəŋ]), is the most populous city in Vietnam with a population of 14,002,598 in 2025.

The city's geography is defined by rivers and canals, of which the largest is Saigon River. As the largest financial centre in Vietnam, Ho Chi Minh City has the largest gross regional domestic product out of all Vietnam provinces and municipalities, contributing around a quarter of the country's total GDP. Ho Chi Minh City's metropolitan area is ASEAN's 5th largest economy, also the biggest outside an ASEAN country capital.

The area was initially part of Cambodian states until it became part of the Vietnamese Nguyễn lords in 1698, due to Lê Vi's expansionist policy of Nam tiến. It was capital of the Nguyễn lords at the end of their existence before the Nguyễn dynasty was formed. After the fall of the Citadel of Saigon, it became the capital of French Cochinchina from 1862 to 1949.

It was also the capital of French Indochina from 1887 to 1902, and again from 1945 until its cessation in 1954. After France recognized Vietnam's independence and unity, it was the capital of the State of Vietnam from 1949 to 1955. Following the 1954 partition, it became the capital of South Vietnam until it was captured by North Vietnam, who created a unified communist state in 1976 and renamed the city after their former leader Ho Chi Minh, though the former name is still widely used in informal usages. Beginning in the 1990s, the city underwent rapid expansion and modernization, which contributed to Vietnam's post-war economic recovery and helped revive its international trade hub status.

Ho Chi Minh City has a long tradition of being one of the centers of economy, entertainment and education in Southern Vietnam in particular and Vietnam in general. It is also the busiest international transport hub in Vietnam, with Tân Sơn Nhất International Airport accounting for nearly half of all international arrivals to Vietnam and the Port of Saigon among the busiest container ports in Southeast Asia.

The city is also a tourist attraction; some of its historic landmarks with modern landmarks, including the Independence Palace, Bitexco Financial Tower, Landmark 81 Tower, the War Remnants Museum, and Bến Thành Market. The city is also known for its narrow walkable alleys and bustling night life, notable is the

Phạm Ngã Lão Ward and the Bùi Viện street in the ward. Since 2025, when Bình Định and Bà Rịa–Vũng Tàu provinces were merged into Ho Chi Minh City, the city has officially become a megacity, while inheriting major industrial towns and coastal cities from the two former provinces. Currently, Ho Chi Minh City is facing increasing threats of sea level rise and flooding as well as heavy strains on public infrastructures.

Yield surface

$$\sigma(\theta, \phi, \psi) = \sigma(0, \phi, \psi), \quad \{\displaystyle \sigma_{\mathrm{eq}} = \sqrt{3} I_2^{1/2}\}, \quad \frac{\Omega_6(\theta, \beta_6, \chi_6)}{\Omega}$$

A yield surface is a five-dimensional surface in the six-dimensional space of stresses. The yield surface is usually convex and the state of stress of inside the yield surface is elastic. When the stress state lies on the surface the material is said to have reached its yield point and the material is said to have become plastic. Further deformation of the material causes the stress state to remain on the yield surface, even though the shape and size of the surface may change as the plastic deformation evolves. This is because stress states that lie outside the yield surface are non-permissible in rate-independent plasticity, though not in some models of viscoplasticity.

The yield surface is usually expressed in terms of (and visualized in) a three-dimensional principal stress space (

?

1

,

?

2

,

?

3

$$\{\displaystyle \sigma_{\{1\}}, \sigma_{\{2\}}, \sigma_{\{3\}}\}$$

), a two- or three-dimensional space spanned by stress invariants (

I

1

,

J

2

,

J

3

$$\{\displaystyle I_{\{1\}},J_{\{2\}},J_{\{3\}}\}$$

) or a version of the three-dimensional Haigh–Westergaard stress space. Thus we may write the equation of the yield surface (that is, the yield function) in the forms:

f

(

?

1

,

?

2

,

?

3

)

=

0

$$\{\displaystyle f(\sigma_{\{1\}},\sigma_{\{2\}},\sigma_{\{3\}})=0\,,\}$$

where

?

i

$$\{\displaystyle \sigma_{\{i\}}\}$$

are the principal stresses.

f

(

I

1

,

J

2

,

J

3

)

=

0

$$\{\displaystyle f(I_{\{1\}},J_{\{2\}},J_{\{3\}})=0\},$$

where

I

1

$$\{\displaystyle I_{\{1\}}\}$$

is the first principal invariant of the Cauchy stress and

J

2

,

J

3

$$\{\displaystyle J_{\{2\}},J_{\{3\}}\}$$

are the second and third principal invariants of the deviatoric part of the Cauchy stress.

f

(

p

,

q

,

r

)

=

0

$$\{\displaystyle f(p,q,r)=0\,,\}$$

where

p

,

q

$$\{\displaystyle p,q\}$$

are scaled versions of

I

1

$$\{\displaystyle I_{-1}\}$$

and

J

2

$$\{\displaystyle J_{-2}\}$$

and

r

$$\{\displaystyle r\}$$

is a function of

J

2

,

J

3

$$\{\displaystyle J_{-2},J_{-3}\}$$

.

f

(

?

$$f(\xi, \rho, \theta) = 0,$$

where

$$\xi, \rho$$

are scaled versions of

$$I_1$$

, and

$$\theta$$

is the stress angle or Lode angle

Tennis at the 2008 Summer Olympics – Men's singles

round) 11. Nicolás Almagro (ESP) (first round) 12. Fernando González (CHI) (final, silver medalist) 13. Mikhail Youzhny (RUS) (third round) 14.

Spain's Rafael Nadal defeated Chile's Fernando González in the final, 6–3, 7–6(7–2), 6–3 to win the gold medal in men's singles at the 2008 Summer Olympics. The win gave him the third of five components of the career Golden Slam, having already won the French Open and Wimbledon. He would go on to win the Australian Open and the US Open to become the second man (after Andre Agassi) to complete the career Golden Slam in singles. Following the event, Nadal became the world No. 1 for the first time, ending Roger Federer's record streak of 237 consecutive weeks with the top ranking. González became the first man to win a medal in men's singles across consecutive Olympiads since Charles Winslow in 1920. In the bronze medal match, Serbia's Novak Djokovic defeated the United States' James Blake (who upset Federer in the quarterfinals), 6–3, 7–6(7–4). It was Serbia's first Olympic tennis medal.

The tournament was held from August 10 to August 17 at the Olympic Green Tennis Centre in Beijing, China. The DecoTurf surface rendered the event a hardcourt competition. There were 64 players from 33 nations.

Chile's Nicolás Massú was the reigning gold medalist from 2004. He lost to Argentina's David Nalbandian in the second round.
