Justin Drew Bieber (BEE-bēr; born March 1, 1994) is a Canadian singer and songwriter. Regarded as a pop icon, he is known for his multi-genre musical performances. He was discovered by Scooter Braun in 2008 and brought to the U.S. by Usher, both of whom formed RBMG Records to sign Bieber in October of that year. His debut extended play, *My World* (2009), was met with international recognition and established him as a teen idol.

Bieber rose to mainstream fame with his debut album, *My World 2.0* (2010), which topped the US Billboard 200 — making him the youngest solo male to do so in 47 years. Its lead single, "Baby" (featuring Ludacris), became one of the best selling singles in the U.S. His second album, *Under the Mistletoe* (2011), became the first Christmas album by a male artist to debut atop chart. Bieber explored dance-pop on his third album, *Believe* (2012); its acoustic re-release made him the first artist in Billboard history to have five US number-one albums by the age of 18.

Bieber explored EDM with his 2015 single "Where Are Ü Now", which won the Grammy Award for Best Dance/Electronic Recording. This influenced his fourth album, *Purpose* (2015), which yielded the singles "Love Yourself", "Sorry", and "What Do You Mean?" — all three peaked the Billboard Hot 100, and simultaneously entered the top three spots on the UK singles chart — making him the first musical act to do so in the chart's history. Two of his 2017 guest appearances — on DJ Khaled's "I'm the One" and Luis Fonsi's "Despacito" — peaked atop the Billboard Hot 100, making him the first artist to replace himself atop chart

with different songs in two consecutive weeks; the latter won him a Latin Grammy Award.

His fifth and sixth albums, *Changes* (2020) and *Justice* (2021), both topped the Billboard 200; the latter included his seventh US-number one single "Peaches" and made him break Elvis Presley's 1965 record for the youngest solo act to have eight US number-one albums. Also in 2021, he released his eighth US number-one single, "Stay" (with the Kid Laroi). Bieber's seventh album, *Swag* (2025), explored a contemporary R&B soundscape.

Bieber is one of the best-selling music artists of all time, with over 150 million units sold worldwide and five diamond certifications from the RIAA. His accolades include two Grammy Awards, one Latin Grammy Award, eight Juno Awards, two Brit Awards, 26 Billboard Music Awards, 18 American Music Awards, and 22 MTV Europe Music Awards (the most wins for any artist). Time named him one of the 100 most influential people in the world in 2011, and Forbes' listed him among the top ten most powerful celebrities from 2011 to 2013. Billboard ranked him the eighth-greatest pop star of the 21st century.

Steven Paul Jobs (February 24, 1955 – October 5, 2011) was an American businessman, inventor, and investor best known for co-founding the technology company Apple Inc. Jobs was also the founder of NeXT and chairman and majority shareholder of Pixar. He was a pioneer of the personal computer revolution of the 1970s and 1980s, along with his early business partner and fellow Apple co-founder Steve Wozniak.

Jobs was born in San Francisco in 1955 and adopted shortly afterwards. He attended Reed College in 1972 before withdrawing that same year. In 1974, he traveled through India, seeking enlightenment before later studying Zen Buddhism. He and Wozniak co-founded Apple in 1976 to further develop and sell Wozniak's Apple I personal computer. Together, the duo gained fame and wealth a year later with production and sale of the Apple II, one of the first highly successful mass-produced microcomputers.

Jobs saw the commercial potential of the Xerox Alto in 1979, which was mouse-driven and had a graphical user interface (GUI). This led to the development of the largely unsuccessful Apple Lisa in 1983, followed by the breakthrough Macintosh in 1984, the first mass-produced computer with a GUI. The Macintosh launched the desktop publishing industry in 1985 (for example, the Aldus Pagemaker) with the addition of the Apple LaserWriter, the first laser printer to feature vector graphics and PostScript.

In 1985, Jobs departed Apple after a long power struggle with the company's board and its then-CEO, John Sculley. That same year, Jobs took some Apple employees with him to found NeXT, a computer platform development company that specialized in computers for higher-education and business markets, serving as its CEO. In 1986, he bought the computer graphics division of Lucasfilm, which was spun off independently as Pixar. Pixar produced the first computer-animated feature film, *Toy Story* (1995), and became a leading animation studio, producing dozens of commercially successful and critically acclaimed films.

In 1997, Jobs returned to Apple as CEO after the company's acquisition of NeXT. He was largely responsible for reviving Apple, which was on the verge of bankruptcy. He worked closely with British designer Jony Ive to develop a line of products and services that had larger cultural ramifications, beginning with the "Think different" advertising campaign, and leading to the iMac, iTunes, Mac OS X, Apple Store, iPod, iTunes Store, iPhone, App Store, and iPad. Jobs was also a board member at Gap Inc. from 1999 to 2002. In 2003, Jobs was diagnosed with a pancreatic neuroendocrine tumor. He died of tumor-related respiratory arrest in 2011; in 2022, he was posthumously awarded the Presidential Medal of Freedom. Since his death, he has won 141 patents; Jobs holds over 450 patents in total.
