Victoriana

Victoriana is a term used to refer to material culture related to the Victorian period (1837–1901). It often refers to decorative objects, but can also

Victoriana is a term used to refer to material culture related to the Victorian period (1837–1901). It often refers to decorative objects, but can also describe a variety of artifacts from the era including graphic design, publications, photography, machinery, architecture, fashion, and Victorian collections of natural specimens. The term can also refer to Victorian-inspired designs, nostalgic representations, or references to Victorian-era aesthetics or culture appropriated for use in new contexts.

The term "Victoriana" was coined in 1918, just before a wave of interest in Victorian objects and artifacts began in the 1920s. Another increased period of collecting of Victoriana emerged in the 1950s. In 1951, the Festival of Britain commemorated the centenary of the Victorian era's first world's fair, the 1851 Great Exhibition held at the Crystal Palace.

In the 1960s and 1970s, the eclectic character of Victorian era wood type inspired graphic designers like Seymour Chwast and Push Pin Studios. Items such as Stevengraphs were popular collectable items during the revival of interest in Victoriana in the 1960s and 1970s.

In the 1980s, Margaret Thatcher, then Prime Minister of the United Kingdom, promoted an interest in Victoriana by emphasizing "Victorian family values" as part of a roadmap to cultural, moral, and economic improvement.

Victoria (Alexandrina Victoria; 24 May 1819 – 22 January 1901) was Queen of the United Kingdom of Great Britain and Ireland from 20 June 1837 until her death. Her reign of 63 years and 216 days, which was longer than those of any of her predecessors, constituted the Victorian era. It was a period of industrial, political, scientific, and military change within the United Kingdom, and was marked by a great expansion of the British Empire. In 1876, the British parliament voted to grant her the additional title of Empress of India.

Victoria was the daughter of Prince Edward, Duke of Kent and Strathearn (the fourth son of King George III), and Princess Victoria of Saxe-Coburg-Saalfeld. After the deaths of her father and grandfather in 1820, she was raised under close supervision by her mother and her comptroller, John Conroy. She inherited the throne aged 18 after her father's three elder brothers died without surviving legitimate issue. Victoria, a

constitutional monarch, attempted privately to influence government policy and ministerial appointments; publicly, she became a national icon who was identified with strict standards of personal morality.

Victoria married her first cousin, Prince Albert of Saxe-Coburg and Gotha, in 1840. Their nine children married into royal and noble families across the continent, earning Victoria the sobriquet "grandmother of Europe". After Albert's death in 1861, Victoria plunged into deep mourning and avoided public appearances. As a result of her seclusion, British republicanism temporarily gained strength, but in the latter half of her reign, her popularity recovered. Her Golden and Diamond jubilees were times of public celebration. Victoria died at Osborne House on the Isle of Wight, at the age of 81. The last British monarch of the House of Hanover, she was succeeded by her son Edward VII of the House of Saxe-Coburg and Gotha.
