

Who Was Rachel Carson

Rachel Carson

Rachel Louise Carson (May 27, 1907 – April 14, 1964) was an American marine biologist, writer, and conservationist whose sea trilogy (1941–1955) and book

Rachel Louise Carson (May 27, 1907 – April 14, 1964) was an American marine biologist, writer, and conservationist whose sea trilogy (1941–1955) and book *Silent Spring* (1962) are credited with advancing marine conservation and the global environmental movement.

Carson began her career as an aquatic biologist in the U.S. Bureau of Fisheries, and became a full-time nature writer in the 1950s. Her widely praised 1951 bestseller *The Sea Around Us* won her a U.S. National Book Award, recognition as a gifted writer, and financial security. Its success prompted the republication of her first book, *Under the Sea Wind* (1941), in 1952, which was followed by *The Edge of the Sea* in 1955 — both were also bestsellers. This sea trilogy explores the whole of ocean life from the shores to the depths.

Late in the 1950s, Carson turned her attention to conservation, especially some problems she believed were caused by synthetic pesticides. The result was the book *Silent Spring* (1962), which brought environmental concerns to an unprecedented share of the American people. Although *Silent Spring* was met with fierce opposition by chemical companies, it spurred a reversal in national pesticide policy, which led to a nationwide ban on DDT and other pesticides. It also inspired a grassroots environmental movement that led to the creation of the U.S. Environmental Protection Agency. Carson was posthumously awarded the Presidential Medal of Freedom by President Jimmy Carter.

The Rachel Carson Greenway is a planned 25-mile stretch of trails, spanning from the historic Adelphi Mill in Prince George's County north through eastern Montgomery County, Maryland to Patuxent River State Park, and incorporating existing Northwest Branch trails. The greenway was proposed as part of a 1998 Countywide Park Trails Plan. A plan for the greenway was approved by the Montgomery County Planning Board on June 15, 2005.

The Rachel Carson Greenway would include a set of three existing trails, including the Northwest Branch trail in Silver Spring, Woodlawn Manor trails in Sandy Spring and Rachel Carson Conservation Park trails near Laytonsville. The Northwest Branch Trail Corridor was officially renamed as the Rachel Carson Greenway on March 20, 2004. The largest section of the greenway consists of a network of unimproved hiking trails through the Northwest Branch stream valley gorge in Burnt Mills, Maryland. A Sandy Spring Heritage Trail is being considered as part of the greenway trail system. In 2008, Montgomery County

approved plans to extend the Rock Creek Park trail system north to Rachel Carson Conservation Park and connect with the Rachel Carson Greenway.

Silent Spring

Silent Spring is an environmental science book by Rachel Carson. Published on September 27, 1962, the book documented the environmental harm caused by

Silent Spring is an environmental science book by Rachel Carson. Published on September 27, 1962, the book documented the environmental harm caused by the indiscriminate use of DDT, a pesticide used by soldiers during World War II. Carson accused the chemical industry of spreading disinformation, and public officials of accepting the industry's marketing claims unquestioningly.

In the late 1950s, Carson began to work on environmental conservation, especially environmental problems that she believed were caused by synthetic pesticides. The result of her research was Silent Spring, which brought environmental concerns to the American public. The book was met with fierce opposition by chemical companies, but it swayed public opinion and led to a reversal in US pesticide policy, a nationwide ban on DDT for agricultural uses, and an environmental movement that led to the creation of the US Environmental Protection Agency.

In 2006, Silent Spring was named one of the 25 greatest science books of all time by the editors of Discover magazine.

Statue of Rachel Carson

Lewis was installed in Waterfront Park in Woods Hole, Massachusetts, United States, on July 14, 2013. The initial plans for the Rachel Carson outdoor

An outdoor sculpture depicting the biologist, conservationist, and author of the same name by David Lewis was installed in Waterfront Park in Woods Hole, Massachusetts, United States, on July 14, 2013.

The Rachel Carson Prize (Rachel Carson-prisen) is an international environmental award, established in Stavanger, Norway in 1991 to commemorate the achievements of environmentalist Rachel Carson and to award efforts in her spirit. The prize is awarded to a woman who has distinguished herself in outstanding work for the environment in Norway or internationally.

The prize was established spontaneously during a 1989 meeting in Stavanger, on the initiative of speaker Berit Ås. The prize consists of money and the sculpture *The Cormorant* by artist Irma Bruun Hodne.
