Jurassic Park, later also referred to as Jurassic World, is an American science fiction media franchise. It focuses on the cloning of prehistoric animals (mainly non-avian dinosaurs) through ancient DNA extracted from mosquitoes that have been fossilized in amber. The franchise explores the ethics of cloning and genetic engineering and the morals behind de-extinction, commercialization of science, and animal cruelty.

The franchise began in 1990 with the release of Michael Crichton's novel Jurassic Park. A 1993 film adaptation, also titled Jurassic Park, was directed by Steven Spielberg. Crichton then wrote a sequel novel, The Lost World (1995), and Spielberg directed its film adaptation, The Lost World: Jurassic Park (1997). Additional films have been released since then, including Jurassic Park III in 2001, completing the original trilogy of films.

The fourth installment, Jurassic World, was released in 2015, marking the start of a new trilogy. Its sequel, Jurassic World: Fallen Kingdom, was released in 2018. Jurassic World Dominion, released in 2022, marks the conclusion of the second trilogy. A standalone sequel, Jurassic World Rebirth, was released in 2025. Two Jurassic World short films have also been released: Battle at Big Rock (2019) and a Jurassic World Dominion prologue (2021).

Theropod dinosaurs like Tyrannosaurus and Velociraptor have had major roles throughout the film series. Other species, including Brachiosaurus and Spinosaurus, have also played significant roles. The series has also featured other creatures, such as Mosasaurus and members of the pterosaur group, both commonly misidentified by the public as dinosaurs. The various creatures in the films were created through a combination of animatronics and computer-generated imagery (CGI). For the first three films, the animatronics were created by special-effects artist Stan Winston and his team, while Industrial Light & Magic (ILM) handled the CGI for the entire series. The first film garnered critical acclaim for its innovations in CGI technology and animatronics. Since Winston's death in 2008, the practical dinosaurs have been created by other artists, including Legacy Effects (Jurassic World), Neal Scanlan (Jurassic World: Fallen Kingdom), and John Nolan (Jurassic World Dominion and Jurassic World Rebirth).

Paleontologist Jack Horner has served as the longtime scientific advisor on the films, and paleontologist Stephen L. Brusatte was also consulted for Jurassic World Dominion and Jurassic World Rebirth. The original film was praised for its modern portrayal of dinosaurs. Horner said that it still contained many inaccuracies, such as not portraying dinosaurs as having colorful feathers, but noted that it was not meant as a documentary. Later films in the series contain inaccuracies as well, for entertainment purposes. This includes the films' velociraptors, which are depicted as being larger than their real-life counterparts. In addition, the franchise's method for cloning dinosaurs has been deemed scientifically implausible for a number of reasons.

Harry and His Bucket Full of Dinosaurs is a series of children's books written and illustrated by Ian Whybrow and Adrian Reynolds. The series is about a 5-year-old boy named Harry, who has a bucket full of six dinosaurs (seven in the books) named Taury, Trike, Patsy, Pterence, Sid, and Steggy. In the books, the dinosaurs talk to Harry but seem to be toys to the other characters. The other main characters are Mum, Nana, Harry's best friend Charlie, and Harry's sister Sam. A major difference is that the book series includes an Anchisaurus while the TV series does not.

It was later adapted into a British-Canadian 104-episode animated television series of the same name, which premiered on Teletoon in Canada on March 28, 2005 and ended in 2008. It is a co-production between CCI Entertainment in Canada and Collingwood O'Hare Entertainment Ltd. in the United Kingdom, presented by CCI Releasing, in association with Discovery Kids Latin America, Teletoon (season 1), Treehouse TV (season 2), Cartoon Network, Super RTL (season 1), Channel 5 Broadcasting Limited (season 2), and Playhouse Disney UK. In the TV series, Harry plays with the dinosaurs by jumping into the bucket, which transports him to another world, called DinoWorld. Although the dinosaurs are toy-sized in the normal world, within DinoWorld they become dinosaur-sized, while Harry retains his actual size. The TV episodes are available on DVD in two volumes.

In 2011, it was announced that the show would have a series of apps for the iOS and Android platform and will include some interactive elements.

In the US, Cartoon Network aired the series as part of its short-lived Tickle-U block. Reruns of the series later aired on Qubo from June 30, 2012, to December 25, 2020.

Happy Tree Friends is an animated series created and developed by Rhode Montijo, Kenn Navarro, and Warren Graff for Mondo Media. A total of six seasons of the series have been released: five seasons on the internet, and one season on television.

In 1999, the crew began the series with a pilot episode, named "Banjo Frenzy", which featured a blue dinosaur, a sky blue squirrel, a yellow rabbit, and a purple beaver. The first official episode was named "Spin Fun Knowin' Ya!" which, although it was produced in 1999, was uploaded to the Mondo Media website sometime in 2000 and featured later versions of the dinosaur (now a moose), rabbit, squirrel, and beaver. From that point on, the writers began introducing new characters to the show. It quickly became an internet phenomenon featuring millions of visits per episode. In 2006, the Happy Tree Friends television series aired on G4 in the United States. It also aired on G4 and Razer in Canada in 2007.

A prequel spin-off called Ka-Pow! debuted in September 2008. In 2010, after airing fifteen episodes for the third web season, a hiatus began, in which there were only Break shorts airing with a subliminal message at the end of each, reading "Happy Tree Friends is dead!". This situation concerned many fans because they thought that the series had been canceled. The writers confirmed that they were playing a joke on the fact that the characters die in the show multiple times, and making a pun phrase with the word "dead". The hiatus ended on December 8, 2011, with the episode "Clause for Concern" being released.

In addition to the show's five seasons and a spin-off, there have been some special episodes and shorts. These include eleven "Smoochies", ten "Kringles", thirteen "Break" shorts, five "Love Bites", and sixteen other irregular episodes that are unindexed. The "Smoochie" shorts involve three different items being dropped next to a main character, only for them to be killed in three different ways, each regarding the item. These have been adapted into the Happy Tree Friends website where one can choose an item to drop. The "Kringles" shorts are Christmas-themed shorts that feature the main characters doing various Christmas-related tasks, only to be killed in various ways. The "Love Bites" were Valentine's Day-themed shorts, that went with the basic structure of a Happy Tree Friends episode. The "Break" shorts were produced in 2008, when no new episodes were produced until the following year. A new break short debuted in 2009.
