

Hacker

Hacker

"claw": Reflecting the two types of hackers, there are two definitions of the word "hacker";: Originally, hacker simply meant advanced computer technology

A hacker is a person skilled in information technology who achieves goals and solves problems by non-standard means. The term has become associated in popular culture with a security hacker – someone with knowledge of bugs or exploits to break into computer systems and access data which would otherwise be inaccessible to them. In a positive connotation, though, hacking can also be utilized by legitimate figures in legal situations. For example, law enforcement agencies sometimes use hacking techniques to collect evidence on criminals and other malicious actors. This could include using anonymity tools (such as a VPN or the dark web) to mask their identities online and pose as criminals.

Hacking can also have a broader sense of any roundabout solution to a problem, or programming and hardware development in general, and hacker culture has spread the term's broader usage to the general public even outside the profession or hobby of electronics (see life hack).

Security hacker

around hackers is often referred to as the "computer underground";. The subculture around such hackers is termed network hacker subculture, hacker scene

A security hacker or security researcher is someone who explores methods for breaching or bypassing defenses and exploiting weaknesses in a computer system or network. Hackers may be motivated by a multitude of reasons, such as profit, protest, sabotage, information gathering, challenge, recreation, or evaluation of a system weaknesses to assist in formulating defenses against potential hackers.

Longstanding controversy surrounds the meaning of the term "hacker". In this controversy, computer programmers reclaim the term hacker, arguing that it refers simply to someone with an advanced understanding of computers and computer networks, and that cracker is the more appropriate term for those who break into computers, whether computer criminals (black hats) or computer security experts (white hats). A 2014 article noted that "the black-hat meaning still prevails among the general public". The subculture that has evolved around hackers is often referred to as the "computer underground".

Security hacker, someone who seeks and exploits weaknesses in a computer system or computer network

Hacker may also refer to:

White hat (computer security)

A white hat (or a white-hat hacker, a whitehat) is an ethical security hacker. Ethical hacking is a term meant to imply a broader category than just penetration

A white hat (or a white-hat hacker, a whitehat) is an ethical security hacker. Ethical hacking is a term meant to imply a broader category than just penetration testing. Under the owner's consent, white-hat hackers aim to identify any vulnerabilities or security issues the current system has. The white hat is contrasted with the black hat, a malicious hacker; this definitional dichotomy comes from Western films, where heroic and antagonistic cowboys might traditionally wear a white and a black hat, respectively. There is a third kind of hacker known as a grey hat who hacks with good intentions but at times without permission.

White-hat hackers may also work in teams called "sneakers and/or hacker clubs", red teams, or tiger teams.

Vinnie Hacker

(May 7, 2024). "Hacker Alert With Vinnie Hacker"; V. Retrieved March 31, 2025. Namaste, Justice (February 20, 2025). "Vinnie Hacker Is The Hype House";s

Vinnie Hacker (born July 14, 2002) is an American influencer, model, and gamer. He became popular on TikTok starting in 2020, largely for posting thirst trap-style videos, and amassed more than 15 million followers by 2023. He joined the TikTok content house the Hype House in 2021, also starring in a Netflix reality television series of the same name (2022) about the house. Hacker participated in the 2021 exhibition boxing event Battle of the Platforms, where he defeated YouTuber Deji. He began modeling at age 15 and signed with IMG Models in 2023. He also livestreams on Twitch, where, as of 2025, he has more than one million followers.

Hacker (surname)

Hacker is a surname. Notable people with the name include: Alan Hacker (1938–2012), English clarinettist Alf Hacker (1912–1970), Australian rules footballer

Hacking may refer to:

Hacker culture

from the hacker ethics that originated at MIT and at the Homebrew Computer Club. The hacker ethics were chronicled by Steven Levy in Hackers: Heroes of

The hacker culture is a subculture of individuals who enjoy—often in collective effort—the intellectual challenge of creatively overcoming the limitations of software systems or electronic hardware (mostly digital electronics), to achieve novel and clever outcomes. The act of engaging in activities (such as programming or other media) in a spirit of playfulness and exploration is termed hacking. However, the defining characteristic of a hacker is not the activities performed themselves (e.g. programming), but how it is done and whether it is exciting and meaningful. Activities of playful cleverness can be said to have "hack value" and therefore the term "hacks" came about, with early examples including pranks at MIT done by students to demonstrate their technical aptitude and cleverness. The hacker culture originally emerged in academia in the 1960s around the Massachusetts Institute of Technology (MIT)'s Tech Model Railroad Club (TMRC) and MIT Artificial Intelligence Laboratory. Hacking originally involved entering restricted areas in a clever way without causing any major damage. Some famous hacks at the Massachusetts Institute of Technology were placing of a campus police cruiser on the roof of the Great Dome and converting the Great Dome into R2-D2.

Richard Stallman explains about hackers who program:

What they had in common was mainly love of excellence and programming. They wanted to make their programs that they used be as good as they could. They also wanted to make them do neat things. They wanted to be able to do something in a more exciting way than anyone believed possible and show "Look how wonderful this is. I bet you didn't believe this could be done."

Hackers from this subculture tend to emphatically differentiate themselves from whom they pejoratively call "crackers": those who are generally referred to by media and members of the general public using the term "hacker", and whose primary focus?—?be it to malign or for malevolent purposes?—?lies in exploiting weaknesses in computer security.

The Hacker

after their U.S. tour, The Hacker and Miss Kittin decided to take a break from their collaborative projects. The Hacker took this opportunity to produce

Michel Amato, better known by his stage name The Hacker, is a French electroclash and techno producer who has worked extensively with Miss Kittin. His work has been influenced by electronic artists like Kraftwerk, new wave artists such as the Cure and Depeche Mode, as well as the French rave scene of the early 1990s. His artist name comes from the Jeff Mills track of the same name.
