21st Century Breakdown

21st Century Breakdown is the eighth studio album by the American rock band Green Day, released on May 15, 2009, through Reprise Records. Green Day commenced

21st Century Breakdown is the eighth studio album by the American rock band Green Day, released on May 15, 2009, through Reprise Records. Green Day commenced work on the record in January 2006 and forty-five songs were written by vocalist and guitarist Billie Joe Armstrong by June 2007, but the band members did not enter studio work until September 2007.

21st Century Breakdown is a concept album/rock opera much like their previous album American Idiot (2004). According to the band, the album is a rumination of "the era in which we live as we question and try to make sense of the selfish manipulation going on around us". The singles "Know Your Enemy" and "21 Guns" exemplify the themes of alienation and politically motivated anger present in the record.

To handle the record, they turned to producer Butch Vig, best known for producing Nirvana's Nevermind (1991). Critical response to 21st Century Breakdown was generally positive. The record achieved Green Day's best chart performance to date, reaching number one on the album charts of various countries, including the United States Billboard 200, the European Top 100 Albums, and the United Kingdom Albums Chart. The album won the Grammy Award for Best Rock Album at the 52nd Grammy Awards on January 31, 2010. As of December 2010, 21st Century Breakdown has sold 1,050,000 copies in the United States and more than 4 million worldwide. At a runtime of 69 minutes and 16 seconds, it is Green Day's longest studio album to date.

Minecraft

Minecraft is a sandbox game developed and published by Mojang Studios. Formally released on 18 November 2011 for personal computers following its initial public alpha release on 17 May 2009, it has been ported to numerous platforms, including mobile devices and various video game consoles.

In Minecraft, players explore a procedurally generated, three-dimensional world with virtually infinite terrain made up of voxels. Players can discover and extract raw materials, craft tools and items, and build structures, earthworks, and machines. Depending on the game mode, players can fight hostile mobs, as well as cooperate with or compete against other players in multiplayer. The game's large community offers a wide variety of user-generated content, such as modifications, servers, player skins, texture packs, and custom maps, which add new game mechanics and possibilities.

Originally created in 2009 by Markus "Notch" Persson using the Java programming language, Jens "Jeb" Bergensten was handed control over the game's continuing development following its full release in 2011. In 2014, Mojang and the Minecraft intellectual property were purchased by Microsoft for US\$2.5 billion; Xbox Game Studios hold the publishing rights for the Bedrock Edition, the cross-platform version based on the mobile Pocket Edition which replaced the existing console versions in 2017. Bedrock is updated concurrently with Mojang's original Java Edition, although with numerous, generally small, differences.

Minecraft is the best-selling video game of all time, with over 350 million copies sold (as of 2025) and 140 million monthly active players (as of 2021). It has received critical acclaim, winning several awards and being cited as one of the greatest video games of all time; social media, parodies, adaptations, merchandise, and the annual Minecon conventions have played prominent roles in popularizing the game. The game's speedrunning scene has attracted a significant following. Minecraft has been used in educational environments to teach chemistry, computer-aided design, and computer science. The wider Minecraft franchise includes several spin-off games, such as Minecraft: Story Mode, Minecraft Earth, Minecraft Dungeons, and Minecraft Legends. A live-action film adaptation, titled A Minecraft Movie, was released in 2025, and became the second highest-grossing video game film of all time.

21st century

The 21st century is the current century in the Anno Domini or Common Era, in accordance with the Gregorian calendar. It began on 1 January 2001, and will

The 21st century is the current century in the Anno Domini or Common Era, in accordance with the Gregorian calendar. It began on 1 January 2001, and will end on 31 December 2100. It is the first century of the 3rd millennium.

The rise of a global economy and Third World consumerism marked the beginning of the century, along with increased private enterprise and deepening concern over terrorism after the September 11 attacks in 2001. The NATO intervention in Afghanistan and the United States-led coalition intervention in Iraq in the early 2000s, as well as the overthrow of several regimes during the Arab Spring in the early 2010s, led to mixed outcomes in the Arab world, resulting in several civil wars and political instability. The early 2020s saw an increase in wars across the world, as seen with conflicts such as the Russian invasion of Ukraine and the Gaza war. Meanwhile, the war on drugs continues, with the focus primarily on Mexico and the rest of Latin America. The United States has remained the sole global superpower, while China is now considered to be an emerging superpower.

In 2022, 45% of the world's population lived in "some form of democracy", although only 8% lived in "full democracies". The United Nations estimates that by 2050, two-thirds of the world's population will be urbanized.

The world economy expanded at high rates from \$42 trillion in 2000 to \$101 trillion in 2022, and though many economies rose at greater levels, some gradually contracted. Effects of global warming and rising sea levels exacerbated the ecological crises, with eight islands disappearing between 2007 and 2014.

In late 2019, the COVID-19 pandemic began to rapidly spread worldwide, causing more than seven million reported deaths, and around 18.2 to 33.5 million estimated deaths, while at the same time, causing severe global economic disruption, including the largest global recession since the Great Depression in the 1930s. The pandemic defined 2020 and 2021, and remained a global health crisis until May 2023.

Due to the sudden proliferation of internet-accessible mobile devices, such as smartphones becoming ubiquitous worldwide beginning in the early 2010s, more than two-thirds of the world's population obtained access to the Internet by 2023. After the success of the Human Genome Project, DNA sequencing services became available and affordable. There were significant improvements in the complexity of artificial intelligence, with American companies, universities, and research labs pioneering advances in the field.

Research into outer space greatly accelerated in the 2020s, with the United States mainly dominating space exploration, including the James Webb Space Telescope, Ingenuity helicopter, Lunar Gateway, and Artemis program.

The Brockhaus Enzyklopädie (German for Brockhaus Encyclopedia) is a German-language encyclopedia which until 2009 was published by the F. A. Brockhaus printing house.

The first edition originated in the Conversations-Lexikon published by Renatus Gotthelf Löbel and Franke in Leipzig 1796–1808. Renamed Der Große Brockhaus in 1928 and Brockhaus Enzyklopädie from 1966, the current 21st thirty-volume edition contains about 300,000 entries on about 24,000 pages, with about 40,000 maps, graphics and tables. It is the largest German-language printed encyclopedia in the 21st century.

In February 2008, F. A. Brockhaus announced the changeover to an online encyclopedia and the discontinuation of the printed editions. The rights to the Brockhaus trademark were purchased by Arvato services, a subsidiary of the Bertelsmann media group. After more than 200 years, the distribution of the Brockhaus encyclopedia ceased completely in 2014.

2026 AFC Women's Asian Cup

The 2026 AFC Women's Asian Cup will be the 21st edition of the AFC Women's Asian Cup, the quadrennial international football tournament in Asia competed

The 2026 AFC Women's Asian Cup will be the 21st edition of the AFC Women's Asian Cup, the quadrennial international football tournament in Asia competed by the women's national teams in the Asian Football Confederation (AFC).

Australia was officially selected as the host nation by the AFC Women's Football Committee on 15 May 2024.

The tournament will serve as the final stage of Asian qualification for the 2027 FIFA Women's World Cup in Brazil. This will be the last time the qualifications will be linked, as a standalone qualifier for the FIFA Women's World Cup will be held starting from the 2031 edition onwards. For the first time, the tournament will also serve as the penultimate stage of Asian qualification for the 2028 Summer Olympics in Los Angeles, with all eight quarter-finalists qualifying for the 2028 AFC Women's Olympic Qualifying Tournament.

China are the defending champions.

My 21st Century Blues is the debut studio album by the British singer-songwriter Raye, released independently by Human Re Sources on 3 February 2023. It marked her first project following her departure from the record label Polydor Records in 2021, which allegedly denied her the release of an album for several years. Largely written and co-produced by herself, she worked with various collaborators including Mike Sabath, BloodPop, Punctual, and Di Genius. 070 Shake and Mahalia appear as featured artists. Encompassing multiple genres, *My 21st Century Blues* explores Raye's struggles with drug addictions, body dysmorphia, and sexual assault, alongside other themes.

My 21st Century Blues spawned seven singles. "Escapism", the album's third single, went viral and became Raye's first song to top the national charts of Ireland, Denmark, and the United Kingdom. It received various accolades and certifications. Other charting singles include "Flip a Switch" and "Worth It", which peaked within the top 40 on the UK singles chart. The album was further supported by a headlining concert tour during 2023 and 2024, and was followed by a live album recorded at the Royal Albert Hall.

Upon its release, *My 21st Century Blues* received acclaim from music critics, many of whom described it as a victory for Raye and praised her performance. Several publications named it one of the best albums of 2023. Commercially, the album debuted at number two on the UK Albums Chart and reached the national rankings of 15 other territories, including top 20 positions in Ireland, Norway, Scotland, and Switzerland. Additionally, it was certified gold in four countries. The album received various accolades, including Album of the Year nominations at the Mercury Prize and MOBO Awards. In 2024, it won British Album of the Year at the Brit Awards, where Raye broke the record for the most wins in a single ceremony.
