New York Undercover is an American police drama that aired on the Fox television network from September 8, 1994, to February 11, 1999. The series starred Malik Yoba as Detective J.C. Williams and Michael DeLorenzo as Detective Eddie Torres, two undercover detectives in New York City's Fourth Precinct who were assigned to investigate various crimes and gang-related cases. The cast also included Patti D'Arbanville-Quinn as their superior, Lt. Virginia Cooper, and Lauren Vélez, who joined the cast in the second season as Nina Moreno, fellow detective and love interest to Torres. New York Undercover was co-created and produced by Dick Wolf, and its storyline takes place in the same fictional universe as Wolf's NBC series Law & Order, its spin-offs, the Chicago and FBI series, and Homicide: Life on the Street.

New York Undercover (whose working title during development was Uptown Undercover, named after the record label, Uptown Records, whose founder and CEO, Andre Harrell, was also the executive producer of the series) is notable for being the first police drama on American television to feature two people of color in the starring roles. In contrast to the popularity of NBC's "Must See TV" on Thursday nights in the 1990s, many African-American viewers flocked to Fox's Thursday-night line-up of Martin, Living Single, and New York Undercover.

Lego City Undercover is a 2013 action-adventure game developed by TT Fusion and published by Nintendo for the Wii U. It was re-released for the Nintendo Switch, PlayStation 4, Windows, and Xbox One by Warner Bros. Interactive Entertainment in 2017. Based on the City-themed toyline by Lego, the narrative follows police officer Chase McCain as he returns to Lego City and pursues escaped crime boss Rex Fury. Gameplay features McCain both exploring the open world hub of Lego City, and completing self-contained levels featuring puzzles and combat.

After satisfactory technical advancements and the completion of other Lego video games featuring existing IPs, the first prototypes for Lego City Undercover were produced in 2010, with development beginning in 2011 after Nintendo approached parent company TT Games about developing for the Wii U. At the time production began, it was to be the first Lego video game featuring voice acting, and it was the first in the TT Games Lego series not to rely on a movie or comic license. The script, written by Graham Goring, made extensive use of parody and references to various media. The Lego City hub was based on multiple real locations. Nintendo was generally hands-off with the development process but would receive updates and suggest changes.

The game was originally announced at E3 2011 as Lego City Stories for Wii U and Nintendo 3DS. Additional info was shown at E3 2012, where the game was also officially renamed to Lego City Undercover. The 3DS version became a standalone prequel, titled Lego City Undercover: The Chase Begins. Lego City Undercover was released in most regions in March 2013, with Japan following in July. The remastered version, which included local two-player multiplayer, was announced in 2016 and released in April 2017. The game received generally positive reviews from critics, who praised the story, humour, and evolved gameplay formula, but criticized the lack of co-op options and varying technical issues, such as long loading times. The original Wii U version sold over 1.15 million copies worldwide as of 31 December 2022.

Need for Speed: Undercover is a 2008 racing video game, and is the twelfth installment in the Need for Speed series following Need for Speed: ProStreet (2007). Developed by EA Black Box and published by Electronic Arts, it was released on November 18, 2008, for the PlayStation 2, PlayStation 3, Xbox 360, Wii, Microsoft Windows, PlayStation Portable, Nintendo DS, and then on a number of mobile phone platforms in 2009.

The game sees players conducting illegal street races within the fictional Tri-City Area, with the main mode's story focused on the player operating as an undercover police officer to investigate links between a criminal syndicate, stolen cars, and street racers. Gameplay operates on the same manner as previous entries such as Need for Speed: Most Wanted and Need for Speed: Carbon, now including a larger selection of licensed real-world cars, and RPG-styled system in the game's main story mode.

Upon its release, the game received mixed reviews, many of which criticized the game's difficulty, story, setting, and repetitive elements, with some editions receiving lower scores due to severe issues. As of 2021, Undercover is no longer available for purchase digitally in any online stores. Undercover was succeeded by Need for Speed: Shift (2009), the Nintendo-exclusive Need for Speed: Nitro (2009), and the Need for Speed: World (2010) MMO.
