

# People Problems

## Rich People Problems

*Rich People Problems is a 2017 satirical romantic comedy novel by Kevin Kwan. It is the third and final novel in Kwan's "Crazy Rich..." trilogy that looks*

Rich People Problems is a 2017 satirical romantic comedy novel by Kevin Kwan. It is the third and final novel in Kwan's "Crazy Rich..." trilogy that looks at the rich and powerful families of Singapore. The plot revolves around the three clans descending upon Shang Su Yi's deathbed to attempt to be included in her will, as she is allegedly extremely wealthy. The novel was preceded by the bestsellers Crazy Rich Asians in 2013 and China Rich Girlfriend in 2015. Two follow-ups to the Crazy Rich Asians film are in development, based on China Rich Girlfriend and Rich People Problems.

## Some People Have Real Problems

*Some People Have Real Problems (sometimes stylised as Some People Have REAL Problems) is the fourth studio album by Australian singer Sia. Released in*

Some People Have Real Problems (sometimes stylised as Some People Have REAL Problems) is the fourth studio album by Australian singer Sia. Released in 2008, the album features five singles: "Day Too Soon", "The Girl You Lost to Cocaine", "Soon We'll Be Found", and "Academia". In live performances of "Soon We'll Be Found", Sia used sign language to accompany her singing. The album displays a more upbeat pop-style than Sia's previous downbeat albums, whilst show-casing Sia's vocals on a number of big ballads.

The fourth single, "Buttons", received attention due to its video in which Sia's face is distorted by pegs, string, net, condoms and many other things. The album debuted at number 26 on the US Billboard 200 chart, which became Sia's first album to chart on the Billboard 200 in her career.

## The Problem with People

*The Problem with People is a 2023 Irish-set buddy comedy film co-written, produced by and starring Paul Reiser. It is directed by Chris Cottam and is*

The Problem with People is a 2023 Irish-set buddy comedy film co-written, produced by and starring Paul Reiser. It is directed by Chris Cottam and is also starring Colm Meaney, Lucianne McEvoy and Jane Levy.

## Problem solving

*classification of problem-solving tasks is into well-defined problems with specific obstacles and goals, and ill-defined problems in which the current*

Problem solving is the process of achieving a goal by overcoming obstacles, a frequent part of most activities. Problems in need of solutions range from simple personal tasks (e.g. how to turn on an appliance) to complex issues in business and technical fields. The former is an example of simple problem solving (SPS) addressing one issue, whereas the latter is complex problem solving (CPS) with multiple interrelated obstacles. Another classification of problem-solving tasks is into well-defined problems with specific obstacles and goals, and ill-defined problems in which the current situation is troublesome but it is not clear what kind of resolution to aim for. Similarly, one may distinguish formal or fact-based problems requiring psychometric intelligence, versus socio-emotional problems which depend on the changeable emotions of individuals or groups, such as tactful behavior, fashion, or gift choices.

Solutions require sufficient resources and knowledge to attain the goal. Professionals such as lawyers, doctors, programmers, and consultants are largely problem solvers for issues that require technical skills and knowledge beyond general competence. Many businesses have found profitable markets by recognizing a problem and creating a solution: the more widespread and inconvenient the problem, the greater the opportunity to develop a scalable solution.

There are many specialized problem-solving techniques and methods in fields such as science, engineering, business, medicine, mathematics, computer science, philosophy, and social organization. The mental techniques to identify, analyze, and solve problems are studied in psychology and cognitive sciences. Also widely researched are the mental obstacles that prevent people from finding solutions; problem-solving impediments include confirmation bias, mental set, and functional fixedness.

## Packing problems

*Packing problems are a class of optimization problems in mathematics that involve attempting to pack objects together into containers. The goal is to*

Packing problems are a class of optimization problems in mathematics that involve attempting to pack objects together into containers. The goal is to either pack a single container as densely as possible or pack all objects using as few containers as possible. Many of these problems can be related to real-life packaging, storage and transportation issues. Each packing problem has a dual covering problem, which asks how many of the same objects are required to completely cover every region of the container, where objects are allowed to overlap.

In a bin packing problem, people are given:

A container, usually a two- or three-dimensional convex region, possibly of infinite size. Multiple containers may be given depending on the problem.

A set of objects, some or all of which must be packed into one or more containers. The set may contain different objects with their sizes specified, or a single object of a fixed dimension that can be used repeatedly.

Usually the packing must be without overlaps between goods and other goods or the container walls. In some variants, the aim is to find the configuration that packs a single container with the maximal packing density. More commonly, the aim is to pack all the objects into as few containers as possible. In some variants the overlapping (of objects with each other and/or with the boundary of the container) is allowed but should be minimized.

## China Rich Girlfriend

*According to a Slash film journal article, the two sequels, including Rich People Problems, were to be shot back-to-back in 2020 once the filming commenced. Shooting*

China Rich Girlfriend is a 2015 satirical romantic comedy novel by Kevin Kwan. It is the sequel to Crazy Rich Asians, a novel about the wealthy Singapore elite. Kwan was urged to write the sequel by his publishers after the initial success of Crazy Rich Asians. The title refers to a line in the novel in which Nick's mother, Eleanor, exclaims over the wealth of the "China rich" who are billionaires, "These people aren't just everyday rich with a few hundred million. They are China rich!" The novel was followed by a third and final sequel, Rich People Problems, in 2017.

## Maria Angelico

*film festival 2016. She appeared as Florence in the web series Other People's Problems in 2017. Angelico starred in the lead role of Daphna in the stage*

Maria Angelico is an Australian actress, writer and producer from Melbourne, Victoria. Angelico is best known for her portrayal of Julia Bechly in the TV series *Sisters* on Network Ten (2017), as Miss Tan in *The InBESTigators* (2019), and as Angie Sanford in the ABC Television drama *Stateless* in 2020.

## Other People's Problems

*Other People's Problems* is the first and only album by The Upper Room. It was released in the United Kingdom on 29 May 2006. The album art, an image of

Other People's Problems is the first and only album by The Upper Room. It was released in the United Kingdom on 29 May 2006.

The album art, an image of the United Kingdom made up of green dots, was based on a survey taken of O2 customers. The size of the green dots indicates the percentage of people who have a garden in each area, and the shade represents the percentage of seasonal affective disorder sufferers in each area.

The tracks "All Over This Town" and "Black and White" were released as singles. "All Over This Town" reached number 38 in the UK singles chart, and "Black and White" reached 22.

## Kevin Kwan

satirical novels *Crazy Rich Asians*, *China Rich Girlfriend*, and *Rich People Problems*. His latest book, *Lies and Weddings*, was released in June 2024. In

Kevin Kwan (born 1973 or 1974) is a Singaporean-born American novelist and writer of satirical novels *Crazy Rich Asians*, *China Rich Girlfriend*, and *Rich People Problems*. His latest book, *Lies and Weddings*, was released in June 2024.

In 2014, Kwan was named as one of the "Five Writers to Watch" on the list of Hollywood's Most Powerful Authors published by The Hollywood Reporter. In 2018, Kwan made Time magazine's list of 100 most influential people and was inducted into The Asian Hall of Fame.

## Josephus problem

*skipping the same number of people, until only one person remains, and is freed. The problem—given the number of people, starting point, direction, and*

In computer science and mathematics, the Josephus problem (or Josephus permutation) is a theoretical problem related to a certain counting-out game. Such games are used to pick out a person from a group, e.g. eeny, meeny, miny, moe.

In the particular counting-out game that gives rise to the Josephus problem, a number of people are standing in a circle waiting to be executed. Counting begins at a specified point in the circle and proceeds around the circle in a specified direction. After a specified number of people are skipped, the next person is executed. The procedure is repeated with the remaining people, starting with the next person, going in the same direction and skipping the same number of people, until only one person remains, and is freed.

The problem—given the number of people, starting point, direction, and number to be skipped—is to choose the position in the initial circle to avoid execution.
