Introduction to Cartography - Introduction to Cartography 49 minutes - Explores the theory of maps, map elements, different types of maps, and the how geographic information systems and remote ...

Intro

Cartography is the study and practice of making and using maps

Maps are the primary tool of geographers - Similar to timelines for historians -Maps are synoptic-show many things at once, revealing connections

"A map is the greatest of all epic poems. Its lines and colors show the realization of great dreams." Gilbert Grosvenor, founding editor of National Geographic

Cartography is both an art and a science -The art includes determining what to include on the map

The map legend or key explains map symbols, like a visual dictionary -No official international symbols

A map scale shows the relationship between distance on the map and distance in the real world

The directional sign can be a simple north arrow or more complex, like a compass rose -On most maps, north is up-but not always

Which way is north?

The graticule is the grid of latitude and longitude lines (parallels and meridians) -Not all maps show a graticule

More map elements - A locator map zooms out to show the larger region -An inset map zooms in to show a detailed area - A neatline shows the limits of the mapped area on the page

A map projection is a method of representing the 3D earth globe flat 2D plane, based on mathematical equations

A cartouche is a decoration used to highlight and emphasize certain parts of a map

Types of maps - Reference or Thematic - Political vs. Physical

Reference vs. Thematic Maps

A reference map shows only locations of things (often called base data) but no special information about them - Examples: General atlas, street map, general political map - Often title is the name of the place

A thematic map shows special information about the features on the map -Ex. people's income levels, rainfall, penguin habitats - Often the title is the theme

Thematic map: John Snow's famous 1854 cholera map of London-helped solve a cholera epidemic Snow is the father of modern epidemiology

A cartogram is a type of thematic map that substitutes a variable for distance or area

Choropleth maps use levels of shading or colors to show the value of a statistical variable

A topographic map is any map showing variations in elevation aka relief

Topological maps (not topographic) are simplified so that only vital information remains -(logos = thought, essence) - Scale is not important

Topological map of DC Metrorail

GIS (Geographic Information Systems) connects maps with valuable information in databases

GIS uses thematic map layers backed by data -Users can run complex math functions across multiple

Remote sensing is acquiring information using a sensor far away -Sensor examples: camera, microphone, radar, laser

Kartography || Kamila Shamsie || Book list 2023 || Book review Urdu - Kartography || Kamila Shamsie || Book list 2023 || Book review Urdu 3 minutes, 31 seconds - Kartography, by Kamila Shamsie is a novel that has received critical acclaim for its exploration of identity and relationships in a ...
